After registering, you will receive a confirmation email containing information about joining the webinar.

About John Tumazos Very Independent Research, LLC

JOHN TUMAZOS VERY INDEPENDENT RESEARCH, LLC (JTVIR LLC) is registered as an investment advisor in the State of NJ. We have 30-odd institutional clients in the U.S. and Canada. We do fundamental research on commodities markets and common [stocks](#) in the metals, fertilizer and forest products sectors. For example, we typically publish 20 investment reports per month and travel for research each month often travelling abroad. We formed our company in 2007 when the former Prudential Equities Group shut

down. We are regulated like a [money](#) manager, but our business is to advise active money managers and we also manage a few accounts. We are not a broker-dealer, but deliver the same basic research services that we had since 1981 as an employee at major brokerage firms. In our business model we sell our research direct payments and deliver it via email and our www.veryindependentresearch.com website. Our clients pay us via direct checks, wire transfer, commission sharing agreements or soft dollar payments. We have limited distribution and depend on our existing reputation, existing relationships and “word of mouth.” We have provided corporate advisory services to seven small emerging mining companies since inception.

About Appia Rare Earths & Uranium Corp.

Appia is a publicly traded Canadian company in the rare earth element and uranium sectors. The Company holds the right to acquire up to a 70% interest in the PCH Ionic Adsorption Clay Project (See June 9th, 2023 Press Release – Click [HERE](#)) which is 40,963.18 ha. in size and located within the Goiás State of Brazil. (See January 11th, 2024 Press Release – [Click HERE](#)) The Company is also focusing on delineating high-grade critical rare earth elements and gallium on the Alces Lake property, and exploring for high-grade uranium in the prolific Athabasca Basin on its Otherside, Loranger, North Wollaston, and Eastside properties. The Company holds the surface rights to exploration for 94,982.39 hectares (234,706.59 acres) in Saskatchewan. The Company also has a 100% interest in 13,008 hectares (32,143 acres), with rare earth elements and uranium deposits over five mineralized zones in the Elliot Lake Camp, Ontario.

Appia has 136.3 million common shares outstanding, 145 million shares fully diluted.
