

# Blue Sky Uranium Files Amended NI-43-101 Report for Preliminary Economic Assessment for Ivana Uranium-Vanadium Deposit, Amarillo Grande Project, Argentina

written by Raj Shah | July 18, 2019

**TSXV: BSK OTCQB: BKUCF**

July 17, 2019 ([Source](#)) – **Blue Sky Uranium Corp. (TSX-V: BSK, FSE: MAL2; OTC: BKUCF), “Blue Sky” or the “Company”**) reports that it has filed an amended NI 43-101 Technical Report (the “Report”) supporting disclosure for its first independent Preliminary

Economic Assessment (“PEA”) for the Ivana Uranium-Vanadium deposit at the Company’s 100% owned Amarillo Grande Project in Rio Negro Province, Argentina subsequent to a technical disclosure review of the report by the British Columbia Securities Commission. None of the original findings of the PEA, as reported in the [February 27th, 2019 news release](#), have changed.

The amended Report, titled “Preliminary Economic Assessment for the Ivana Uranium-Vanadium Deposit, Amarillo Grande Project” with an effective date of February 27th, 2019, is available under the Company’s profile on SEDAR at [www.sedar.com](http://www.sedar.com) and will be posted to the Company’s website [www.blueskyuranium.com](http://www.blueskyuranium.com).

**Qualified Persons**

Dr. David Terry, Ph.D., P.Geo. is a Director of the Company and a Qualified Person as defined in National Instrument 43-101. The contents of this news release have been reviewed and approved by Dr. Terry.

### **About the Amarillo Grande Project**

The Company's 100% owned Amarillo Grande Uranium-Vanadium Project in Rio Negro Province, Argentina is a new uranium district controlled by Blue Sky. The Ivana deposit is the cornerstone of the Project and the first part of the district for which both a Mineral Resource Estimate and a Preliminary Economic Assessment have been completed. Mineralization at the Ivana deposit has characteristics of sandstone-type and surficial-type uranium-vanadium deposits. The sandstone-type mineralization is related to a braided fluvial system and indicates the potential for a district-size system. In the surficial-type deposits, mineralization coats loosely consolidated pebbles, and is amenable to leaching and simple upgrading.

The Project includes several other target areas over a regional trend, at or near surface. The area is flat-lying, semi-arid and accessible year-round, with nearby rail, power and port access.

For additional details on the project and properties, please see the Company's website.

### **About Blue Sky Uranium Corp.**

Blue Sky Uranium Corp. is a leader in uranium discovery in Argentina. The Company's objective is to deliver exceptional returns to shareholders by rapidly advancing a portfolio of surficial uranium deposits into low-cost producers. Blue Sky holds the exclusive right to properties in two provinces in Argentina. The Company's flagship Amarillo Grande Project was

an in-house discovery of a new district that has the potential to be both a leading domestic supplier of uranium to the growing Argentine market and a new international market supplier. The Company is a member of the Grosso Group, a resource management group that has pioneered exploration in Argentina since 1993.

ON BEHALF OF THE BOARD
