current economics and the results of a sizeable drill program completed in 2020. We look forward to announcing the details of our multi-phased strategic plan for Destiny in the coming weeks, which will commence with an updated mineral resource estimate in Q1 2025. We will also outline our plans for the potential expansion of the updated mineral resource estimate through systematic drilling in several prospective zones identified by dozens of historical drill holes covering a considerable mineralized strike length beyond the resource zone.”
