

Coniagas Battery Metals Announces Results of Annual Meeting

written by Raj Shah | August 13, 2024

August 13, 2024 ([Source](#)) – Coniagas Battery Metals Inc. (“Coniagas” or the “Company”) (TSXV: COS) is pleased to announce that all six nominees listed in its management information circular dated June 26, 2024 were elected as directors at the Company’s annual meeting held today in Montreal with a vote of more than 99% of the votes cast at the meeting. Coniagas’ Board of Directors now consists of Jessie Acton, Daniel Barrette, Aurelian Basa, Frank J. Basa, Ronald Goguen, Sr. and Heidi Gutte.

At the meeting, shareholders also approved a resolution confirming an amendment to Coniagas’ by-laws pertaining to quorum for shareholders’ meetings and reappointed McGovern Hurley LLP, Chartered Professional Accountants, as Coniagas’ auditor.

About Coniagas Battery Metals Inc.

Coniagas Battery Metals Inc. is a Canadian junior mining company, focused on nickel, copper, cobalt, and platinum group metals in Québec. The Company’s strategy aims to generate shareholder value by developing its mineral assets and constructing an advanced processing plant, positioning Coniagas as a potential key supplier for the electric vehicle (EV) industry.

Graal Project: Strategic Resource Development

The 100%-owned Graal project near Saguenay, Quebec, has shown

significant potential through extensive geophysical surveys and shallow drilling. It has identified high-grade nickel and copper mineralization, with showings of cobalt, platinum, and palladium, along a 6 km strike length at shallow depths potentially suitable for open-pit mining. Upcoming activities include further drilling, metallurgical testing, and consultations with First Nations, culminating in a NI 43-101 resource report. [The NI 43-101 Technical Report Graal Nickel & Copper Project, Saguenay-Lac-St-Jean, Quebec, Canada](#), dated January 17, 2024, provides detailed project information.

Long-Term Vision and Commercialization Strategy

Coniagas leverages proprietary technologies like the Re-20x hydrometallurgical process for the extraction and production of cleaner, low-carbon, battery-grade materials. This innovative process eliminates the need for traditional smelting, significantly reducing the environmental footprint. Combined with strategic projects such as Graal and CAM/pCAM production initiatives, Coniagas is positioning itself as a potential player in the future of the EV industry.
