dynaCERT Invited to Present at the International Investment Forum (IIF)

written by Raj Shah | September 20, 2022 May 16, 2022 (<u>Source</u>) – *dynaCERT* Inc. (TSX: DYA) (OTCQX: DYFSF) (FRA: DMJ) ("*dynaCERT*" or the "Company") is pleased to announce that *dynaCERT* will be presenting at the third International Investment Form ("IIF") on May 19th, 2022.

Jim Payne, CEO of dynaCERT, will be presenting at 10:00 am EST on May 19th, 2022.

IIF provides invited board members of listed companies to present directly to high net worth individuals and institutions, without distraction, in a 40-minute Zoom interview. Questions can be asked via chat and are answered live. *dynaCERT* is pleased to participate in this excellent opportunity for direct international investor contact.

This is the third International Investment Forum being held, bringing together interested investors with selected listed small and mid-caps from around the world. At the last IIF, over 1,000 participants from all continents registered for this digital event held in English. IIF is made possible by its partners, Apaton Finance GmbH and GBC AG, who also sponsor dynaCERT.

Jim Payne, President & CEO of *dynaCERT* stated, "On behalf of *dynaCERT*, I am looking forward to presenting at the third International Investment Form at 10:00 am EST on May 19th, 2022. As oil prices soar to new highs and the entire globe now is finally learning to deal economically with the huge detrimental impacts of COVID, the outlook for our business has never been so good. Our proprietary and patented HydraGEN[™] Technology is designed to reduce fuel consumption in internal combustion engines and reduce Carbon and NOx emissions, so important to providing a global solution to reduce pollution."

About *dynaCERT* Inc.

dynaCERT Inc. manufactures and distributes Carbon Emission Reduction Technology for use with internal combustion engines. As part of the growing global hydrogen economy, our patented technology creates hydrogen and oxygen on-demand through a unique electrolysis system and supplies these gases through the air intake to enhance combustion, resulting in lower carbon emissions and greater fuel efficiency. Our technology is designed for use with many types and sizes of diesel engines on-road vehicles, reefer trailers, off-road used in construction, power generation, mining and forestry equipment, locomotives. marine vessels and railroad Website: www.dynaCERT.com.

READER ADVISORY

Except for statements of historical fact, this news release contains certain "forward-looking information" within the meaning of applicable securities law. Forward-looking information is frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may" or "will" occur. Although we believe that the expectations reflected in the forward-looking information are reasonable, there can be no assurance that such expectations will prove to be correct. We cannot guarantee future results, performance of achievements. Consequently, there is no representation that the actual results achieved will be the same, in whole or in part, as those set out in the forwardlooking information.

Forward-looking information is based on the opinions and estimates of management at the date the statements are made and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated in the forward-looking information. Some of the risks and other factors that could cause the results to differ materially from those expressed in the forward-looking information include, but are not limited to: uncertainty as to whether our strategies and business plans will yield the expected benefits; availability and cost of capital; the ability to identify and develop and achieve commercial success for new products and technologies; the level of expenditures necessary to maintain and improve the quality of products and services; changes in technology and changes in laws and regulations; the uncertainty of the emerging hydrogen economy; including the hydrogen economy moving at a pace not anticipated; our ability to secure and maintain strategic relationships and distribution agreements; and the other risk factors disclosed under our profile on SEDAR at <u>www.sedar.com</u>. Readers are cautioned that this list of risk factors should not be construed as exhaustive.

The forward-looking information contained in this news release is expressly qualified by this cautionary statement. We undertake no duty to update any of the forward-looking information to conform such information to actual results or to changes in our expectations except as otherwise required by applicable securities legislation. Readers are cautioned not to place undue reliance on forward-looking information.

Neither the Toronto Stock Exchange nor its Regulation Services Provider (as that term is defined in the policies of the Toronto Stock Exchange) accepts responsibility for the adequacy or accuracy of the release.

On Behalf of the Board
