

# **dynaCERT to Exhibit at IAA Transportation 2022, the World's Largest Platform for Transport and Logistics, to be held in Hanover, Germany from September 20th to 25th**

written by Raj Shah | September 15, 2022

September 15, 2022 ([Source](#)) – *dynaCERT* Inc. (TSX: DYA) (OTCQX: DYFSF) (FRA: DMJ) ("*dynaCERT*" or the "Company") is pleased to announce its participation exhibiting at the IAA Transportation Trade Show 2022 being held from September 20<sup>th</sup> to 25<sup>th</sup> in Hanover, Germany. IAA Transportation, under the motto "People and Goods on the Move", is the world's largest platform for transport and logistics and will host over 2,000 exhibitors from across the world. More than 250,000 attendees are expected during the six days of the show.

At the IAA Transportation Trade Show 2022 *dynaCERT* will be exhibiting its proprietary HydraGEN™ Technology designed to reduce fuel consumption and pollutants such as GHG's currently available globally for small, medium and large diesel vehicles and generators.

IAA Transportation presents the world of buses, van, trucks, trailers and bodies in all its facets. The exhibition provides content for all aspects of sustainable, social, technical, economic and political aspects of global transport. International opinion leaders from all relevant industries will be discussing the challenges of our time and present their

solutions and visions for the global and regional transport of the future.

*dynaCERT* will be exhibiting at Booth D15 in Hall 24 with demonstrations of its flagship products, the internationally renowned HG1 and HG2.

Daily presentations of the company's HydraLytica™ app will held at 11:00 am and 3:00 pm throughout the exhibition.

Enrico Schlaepfer, Vice President Global Sales & Marketing for *dynaCERT*, states, "As part of our CCF (Corporate Carbon Footprint) at *dynaCERT*, we not only want to reduce world-wide CO<sub>2</sub>e emissions with our HydraGEN™ Technology, but also feel compelled this year to make our booth at the "IAA Transportation" absolutely 100% climate neutral. We pursue an approach that is more transparent and comprehensible than a simple CO<sub>2</sub>e-Offset Certificate. For each component of our exhibit, we calculate the exact amount of CO<sub>2</sub>e emissions and then offset this GHG footprint by planting trees at the Hanover exhibition center and the surrounding area. The Company's HydraGEN™ Technology is the one technology that bridges the gap to the ecological transition and provides a cost-effective solution to the world today!"

Jim Payne, President & CEO of *dynaCERT*, comments, "After the unexpected planetary disruptions of the past two years caused by the COVID pandemic, *dynaCERT* is extremely pleased and very eager to be able to relaunch its high-profile global marketing drives and trade show initiatives. With our 47 dealers world-wide supported by our dedicated European and North American in-house professionals, we are strongly committed to furthering our international presence in 2022 and beyond."

### **About dynaCERT Inc.**

dynaCERT Inc. manufactures and distributes Carbon Emission Reduction Technology for use with internal combustion engines. As part of the growing global hydrogen economy, our patented technology creates hydrogen and oxygen on-demand through a unique electrolysis system and supplies these gases through the air intake to enhance combustion, resulting in lower carbon emissions and greater fuel efficiency. Our technology is designed for use with many types and sizes of diesel engines used in on-road vehicles, refrigerated trailers, off-road construction, power generation, mining and forestry equipment, marine vessels and railroad locomotives. ### **READER ADVISORY**

*Except for statements of historical fact, this news release contains certain "forward-looking information" within the meaning of applicable securities law. Forward-looking information is frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may" or "will" occur. Although we believe that the expectations reflected in the forward-looking information are reasonable, there can be no assurance that such expectations will prove to be correct. We cannot guarantee future results, performance of achievements. Consequently, there is no representation that the actual results achieved will be the same, in whole or in part, as those set out in the forward-looking information.*

*Forward-looking information is based on the opinions and estimates of management at the date the statements are made, and*

are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated in the forward-looking information. Some of the risks and other factors that could cause the results to differ materially from those expressed in the forward-looking information include, but are not limited to: uncertainty as to whether our strategies and business plans will yield the expected benefits; availability and cost of capital; the ability to identify and develop and achieve commercial success for new products and technologies; the level of expenditures necessary to maintain and improve the quality of products and services; changes in technology and changes in laws and regulations; the uncertainty of the emerging hydrogen economy; including the hydrogen economy moving at a pace not anticipated; our ability to secure and maintain strategic relationships and distribution agreements; and the other risk factors disclosed under our profile on SEDAR at [www.sedar.com](http://www.sedar.com). Readers are cautioned that this list of risk factors should not be construed as exhaustive.

The forward-looking information contained in this news release is expressly qualified by this cautionary statement. We undertake no duty to update any of the forward-looking information to conform such information to actual results or to changes in our expectations except as otherwise required by applicable securities legislation. Readers are cautioned not to place undue reliance on forward-looking information.

**Neither The Toronto Stock Exchange nor its Regulation Services Provider (as that term is defined in the policies of The Toronto Stock Exchange) accepts responsibility for the adequacy or accuracy of the release.**
