***dynaCERT* President & CEO, Jim Payne, will be presenting at 9:40 am – 10:10 am EST for 30 minutes.**

Please register here to ensure you are able to attend the conference and receive any updates that are released: [Register for *dynaCERT* Presentation](#)

If attendees are not able to join the event live on the day of the conference, an archived webcast will also be made available on [EmergingGrowth.com](#) and we will also release a link to that after the event.

Jim Payne states, “As a first time presenter at the Emerging

Growth Conference, I look forward to providing their audience and investment community with an overview of *dynaCERT*, as well as our existing loyal shareholders and investors. *dynaCERT* has recently announced a significant order for their HydraGEN[™] Technology Units. *dynaCERT* is pleased to provide an opportune time for investors to learn more about the Company's progress and Carbon Emission Reduction Technology which is designed to reduce fuel consumption but more importantly reduces harmful carbon emissions."

About the Emerging Growth Conference

The Emerging Growth conference is an effective way for public companies to present and communicate their new products, services and other major announcements to the investment community from the convenience of their office, in a time efficient manner. The Conference focus and coverage includes companies in a wide range of growth sectors, with strong management teams, innovative products & services, focused strategy, execution, and the overall potential for long term growth. Its audience includes potentially tens of thousands of Individual and Institutional investors, as well as Investment advisors and analysts. All sessions will be conducted through video webcasts and will take place in the Eastern time zone.

About *dynaCERT* Inc.

dynaCERT Inc. manufactures and distributes Carbon Emission Reduction Technology along with its proprietary HydraLytics[™] Telematics, a means of monitoring fuel consumption and calculating GHG emissions savings designed for the tracking of possible future Carbon Credits for use with internal combustion engines. As part of the growing global Hydrogen Economy, our patented technology creates hydrogen and oxygen on-demand through a unique electrolysis system and supplies these gases

through the air intake to enhance combustion, which has shown to lower carbon emissions and improve fuel efficiency. Our technology is designed for use with many types and sizes of diesel engines used in on-road vehicles, reefer trailers, off-road construction, power generation, mining and forestry equipment.
