

# Fieldwork Resumes at Renforth's Parbec Gold Deposit in Malartic, Quebec

written by Raj Shah | February 9, 2026

## HIGHLIGHTS

### *Parbec*

- Chipping and stripping program within open pit footprint at Parbec stopped in November 2025 has resumed.
- Regulatory feasibility of bulk sample project confirmed

### *Victoria Polymetallic Deposit*

- Platinum and Palladium testwork results received, consistent presence in the Victoria deposit confirmed

### *Financing*

- Final closing of previously announced financing has occurred

February 9, 2026 ([Source](#)) – **Renforth Resources Inc.** (CSE: RFR) (OTC: RFHRF) (FSE: 9RR) (“Renforth” or the “Company”), is pleased to inform shareholders of positive developments at our Parbec Gold Deposit, our Victoria critical minerals polymetallic deposit and various corporate matters as follows;

### **Parbec Gold Deposit**

Renforth has resumed the chipping and stripping program which

was paused in November, targeting a permitted area within the open pit footprint and above the planned location of the underground bulk sample, alongside the termination of the underground decline.

Formal exchanges have been initiated with the MRNF and MELCC to confirm the appropriate permitting pathway for the bulk sample. The feedback received has been positive and confirms the regulatory feasibility of the bulk sample project.

The ATI permitting process for the bulk sample program has been initiated, as has the environmental base line study. The geological resource model is being reviewed and updated with a focus on an underground mining scenario.

### **Victoria Nickel Sulphide Polymetallic Open Pit Deposit**

Renforth has received the results from the samples of witness core from various lithologies tested for platinum and palladium, successfully proving that these metals form a part of the mineralized ultramafic package at Victoria. Further mineralogical investigation will define in which mineral phase these elements are present and where they are located in the minerals assemblage.

With this information future assaying will include these elements this, combined with the now complete testing of witness core for the current resource, will allow the inclusion of platinum and palladium in the next resource statement.

### **Financing**

Renforth has completed the previously announced financing with an additional \$30,000 in common share units sold and \$15,000 in 2026 flow through shares sold.

### **Options Issuance**

Renforth has issued a total of 8,850,000 options exercisable at \$0.05 for a period of five years to certain officers, director and consultants to the Company.

### **Qualified Person**

Martin Demers P.Geo OGQ a qualified person pursuant to the guidelines in NI 43-101 and VP of Exploration for Renforth has reviewed and approved the geological information contained in this press release.

### **About Renforth Resources Inc.**

Renforth Resources is a junior exploration and development company focused on advancing gold and polymetallic projects in Québec's Abitibi mining district. Its flagship asset, the wholly-owned Parbec Gold Deposit – located beside Agnico Eagle Mines Ltd.'s Canadian Malartic mine – currently hosts 265,800 ounces of gold in the Measured and Indicated categories within 9.61 Mt grading 0.86 g/t Au and 97,000 ounces in the Inferred category within 2.55 Mt grading 1.18 g/t Au, within an open-pit scenario using a cut-off grade determined using a value of US\$ 2,100 per ounce of Gold in April 2025.

Resource Report					
Type	Cut-Off Grade (Au g/t)	Classification	Tonnage (Mt)	Au Grade (g/t)	Ounces (koz Au)
Open Pit	0.27	Measured	1.40	0.98	44.1
		Indicated	8.20	0.84	221.7
		<b>Measured+Indicated</b>	<b>9.61</b>	<b>0.86</b>	<b>265.8</b>
Open Pit	0.27	Inferred	1.80	0.85	48.9
Underground	1.40	Inferred	0.75	1.98	48.1
<b>Open Pit + Underground</b>	<b>0.27 / 1.40</b>	<b>Inferred</b>	<b>2.55</b>	<b>1.18</b>	<b>97.0</b>

(1) Mineral Resources are reported at a cut-off grade of 0.27 g/t Au for the open-pit mining scenario and 1.40 g/t Au for the underground mining scenario

(2) The cut-off grades were determined at a gold price of 2,100 US\$ per ounce.

(3) The mineral resources were estimated in compliance with Canadian Institute of Mining, Metallurgy and Petroleum standards. These mineral resources were reported in accordance with the NI 43-101 standards.

(4) Mineral resources do not constitute mineral reserves because they have not demonstrated economic viability.

(5) Inferred resources are exclusive of measured and indicated resources.

(6) The effective date of these mineral resources is April 4, 2025.

(7) Assumptions used are a mining recovery of 95%, a mining dilution of 5%, processing recovery of 95%, processing cost of 12.75 US\$/t, general and administration of 1.50 US\$/t, open-pit mining cost of 2.5 US\$/t for ore, 2 US\$/t for waste and underground mining cost of 66 US\$/t.

(8) All resources are presented in-situ and undiluted.

(9) All \$ values are in US\$ unless specifically noted.

(10) All figures are rounded to reflect the relative accuracy of the estimate. Numbers may not add due to rounding.

Renforth also controls the district-scale Malartic Metals Package, which includes the Victoria Polymetallic Deposit. In Sept. 2025, the company declared an initial NI 43-101 inferred resource for Victoria of 125 Mt grading 0.15 % NiEq, an open-pit polymetallic system over 2.5km using trailing average metal prices current at that time.

### ***Victoria Pit-Constrained Inferred Mineral Resource Estimate<sup>(1-13)</sup>***

Classification	Cut-Off NSR/C\$/t	Tonnes M	Ni %	Cu %	Co %	Zn %	Ag g/t	NiEq %	NiEq Mlb
Inferred	20	125	0.12	0.02	0.01	0.08	0.38	0.15	413

1. Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues.
2. The Inferred Mineral Resource in this estimate has a lower level of confidence than that applied to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of the Inferred Mineral Resource could be upgraded to an Indicated Mineral Resource with continued exploration.
3. The Mineral Resources in this estimate were calculated using the Canadian Institute of Mining, Metallurgy and Petroleum (CIM). CIM Standards on Mineral Resources and Reserves, Definitions and Guidelines (2014) prepared by the CIM Standing Committee on Reserve Definitions and adopted by CIM Council and CIM Best Practices Guidelines (2019).
4. July 2025 Consensus Economics long-term forecast metal US\$ prices of Ni \$8/lb, Cu \$4.5/lb, Co \$18/lb, Zn \$1.25/lb, Ag \$30/oz.
5. Exchange rate of US\$0.73 = C\$1.00
6. Process recoveries and payables combined of Ni 75%, Cu 50%, Co 50%, Zn 50%, Ag 50%
7. Open pit C\$20/t cut-off derived from C\$17/t processing and C\$3/t G&A
8. Pit slopes are 50 degrees, with strip ratio of less than 1:1.
9. Totals may not sum due to rounding.
10.  $\text{NiEq\%} = \text{Ni\%} + (\text{Cu\%} \times 0.38) + (\text{Co\%} \times 1.50) + (\text{Zn\%} \times 0.10) + (\text{Ag g/t} \times 0.66)$
11. Grade capping was not required on the 1.5m composites.
12. Grade estimation into the 5m x 5m x 5m non-rotated block model was undertaken with the Inverse Distance Squared method.
13. A uniform bulk density of 2.8 t/m<sup>3</sup> was utilized.

### **Forward-Looking Statements**

This news release contains forward-looking statements and information under applicable securities laws. All statements, other than statements of historical fact, are forward looking. Forward-looking statements are frequently identified by such words as "may," "will," "plan," "expect," "believe,"

“anticipate,” “estimate,” “intend” and similar words referring to future events and results. Such statements and information are based on the current opinions and expectations of management. All forward-looking information is inherently uncertain and subject to a variety of assumptions, risks and uncertainties, including the speculative nature of mineral exploration and development, fluctuating commodity prices, the risks of obtaining necessary approvals, licenses and permits and the availability of financing, as described in more detail in the Company’s securities filings available at [www.sedar.com](http://www.sedar.com). Actual events or results may differ materially from those projected in the forward-looking statements and the reader is cautioned against placing undue reliance thereon. Forward-looking information speaks only as of the date on which it is provided, and the Company assumes no obligation to revise or update these forward-looking statements except as required by applicable law.
