

FuelPositive Closes First \$1.5m Tranche of Non-Brokered Private Placement

written by Raj Shah | May 28, 2024

May 28, 2024 ([Source](#)) – FuelPositive Corporation (TSX.V: NHHH) (OTCQB: NHHHF) (the “Company”) is pleased to announce that it has closed the first tranche of its non-brokered private placement (the “Offering”). In connection with completion of the first tranche of the Offering, the Company has issued 28,123,818 units (each, a “Unit”) at a price of \$0.055 per Unit for gross proceeds of \$1,546,810. Each Unit consists of one common share of the Company and one common share purchase warrant (each, a “Warrant”) allowing holders to purchase an additional common share at a price of \$0.07 for a period of sixty months.

The Company anticipates completing a further tranche of the Offering to raise total proceeds of up to \$3,000,000 and will provide further details regarding closing of this additional tranche as soon as all participation has been finalized.

The net proceeds from the Offering will be utilized for general working capital purposes. In connection with completion of the first tranche of the Offering, the Company has paid finders’ fees of \$5,390 and issued 98,000 Warrants to an arms-length brokerage firm who assisted in introducing subscribers to the Company. All securities issued in connection with the Offering are subject to a statutory hold period of four-months-and-one-day in accordance with applicable securities laws.

The Company also announces that it has revised the debt settlement (the “Debt Settlement”) transaction previously announced on May 17, 2024. The Company will now settle

outstanding indebtedness totaling \$110,075 owing to certain arms-length creditors in consideration for the issuance of 2,001,364 Units at a deemed price of \$0.055 per Unit. Completion of the Debt Settlement remains subject to the approval of the TSX Venture Exchange.

About FuelPositive Corporation

FuelPositive is a Canadian technology company dedicated to delivering commercially feasible and sustainable clean technology solutions that follow a circular approach, ensuring the entire lifecycle of our products is environmentally friendly. This includes an on-farm/onsite, containerized Green Ammonia (NH₃) production system that effectively eliminates carbon emissions during the production process.

By focusing on technologies that are clean, sustainable, economically advantageous and realizable, the Company aims to help mitigate climate change, addressing unsustainable agricultural practices through innovative technology and practical solutions that can be implemented now. The FuelPositive on-farm/onsite, containerized Green Ammonia production system is designed to produce pure, anhydrous ammonia for multiple applications, including fertilizer for farming, fuel for grain drying and internal combustion engines, a practical alternative for fuel cells and a solution for grid storage. Green Ammonia is also considered a key enabler of the hydrogen economy.

FuelPositive systems are designed to provide for Green Ammonia production on-farm/onsite, where and when needed. This eliminates wildly fluctuating supply chains and offers end-users clean fertilizer, energy and Green Ammonia supply security while eliminating carbon emissions from the production process. The first customers will be farmers. Farmers use 80% of the

traditional grey ammonia produced today as fertilizer.

Forward-Looking Statements

This news release contains certain “forward-looking information” and “forward-looking statements” (collectively, “forward-looking statements”) that are based on expectations, estimates and projections as of the date of this news release. The information in this release about future plans and objectives of the Company, including with respect to further testing and implementation of the Company’s systems and technologies, are forward-looking statements.

These forward-looking statements are based on assumptions and estimates of management of the Company at the time they were made and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company as of the time of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. These estimates and assumptions may prove to be incorrect.

Many of these uncertainties and contingencies can directly or indirectly affect and could cause, actual results to differ materially from those expressed or implied in any forward-looking statements. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated

in such statements.

Forward-looking information is provided for the purpose of providing information about management's expectations and plans relating to the future. The Company disclaims any intention or obligation to update or revise any forward-looking information or to explain any material difference between subsequent actual events and such forward-looking information, except to the extent required by applicable law.
