

FuelPositive Provides Update on Second Tranche of CA\$3m Private Placement

written by Raj Shah | June 7, 2024

June 7, 2024 ([Source](#)) – FuelPositive Corporation (TSX.V: NHHH) (OTCQB: NHHHF) (the “Company”) announces that further to its news release of May 28, 2024 in connection with closing of the first tranche (CA\$1.5m) of its \$0.055 unit non-brokered private placement (the “Offering”), the Company has received an extension of the deadline for completion of the Offering from the TSX Venture Exchange, and anticipates completing a final tranche of the Offering before June 24, 2024.

The Company also announces that it will settle (the “Debt Settlement”) further outstanding indebtedness totaling \$27,500 owing to an arms-length creditor in consideration for the issuance of 500,000 units (each, a “Unit”) at a deemed price of \$0.055 per Unit. Each Unit will consist of one common share of the Company, and one share purchase warrant exercisable at a price of \$0.07 for a period of sixty months. All securities issued in connection with the Debt Settlement will be subject to restrictions on resale for a period of four-months-and-one-day in accordance with applicable securities laws. Completion of the Debt Settlement remains subject to the approval of the TSX Venture Exchange.

About FuelPositive Corporation

FuelPositive is a Canadian technology company dedicated to delivering commercially feasible and sustainable clean technology solutions that follow a circular approach, ensuring the entire lifecycle of our products is environmentally

friendly. This includes an on-farm/onsite, containerized Green Ammonia (NH₃) production system that effectively eliminates carbon emissions during the production process.

By focusing on technologies that are clean, sustainable, economically advantageous and realizable, the Company aims to help mitigate climate change, addressing unsustainable agricultural practices through innovative technology and practical solutions that can be implemented now. The FuelPositive on-farm/onsite, containerized Green Ammonia production system is designed to produce pure, anhydrous ammonia for multiple applications, including fertilizer for farming, fuel for grain drying and internal combustion engines, a practical alternative for fuel cells and a solution for grid storage. Green Ammonia is also considered a key enabler of the hydrogen economy.

FuelPositive systems are designed to provide for Green Ammonia production on-farm/onsite, where and when needed. This eliminates wildly fluctuating supply chains and offers end-users clean fertilizer, energy and Green Ammonia supply security while eliminating carbon emissions from the production process. The first customers will be farmers. Farmers use 80% of the traditional grey ammonia produced today as fertilizer.

Cautionary Statement

Trading in the securities of the Company should be considered highly speculative. No stock exchange, securities commission or other regulatory authority has approved or disapproved the information contained herein. Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accept responsibility for the adequacy or accuracy of this release.

Forward-Looking Statements

This news release contains certain “forward-looking information” and “forward-looking statements” (collectively, “forward-looking statements”) that are based on expectations, estimates and projections as of the date of this news release. The information in this release about future plans and objectives of the Company, including with respect to further testing and

implementation of the FP300 system, are forward-looking statements.

These forward-looking statements are based on assumptions and estimates of management of the Company at the time they were made and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company as of the time of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. These estimates and assumptions may prove to be incorrect.

Many of these uncertainties and contingencies can directly or indirectly affect and could cause, actual results to differ materially from those expressed or implied in any forward-looking statements. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements.

Forward-looking information is provided for the purpose of providing information about management's expectations and plans relating to the future. The Company disclaims any intention or obligation to update or revise any forward-looking information or to explain any material difference between subsequent actual events and such forward-looking information, except to the extent required by applicable law.
