

Global Energy Metals Announces OTCQB Approval and Trade Increasing Exposure to U.S. Capital Markets Seeking Battery Metal Investment

written by Raj Shah | September 15, 2021

September 15, 2021 ([Source](#)) – [Global Energy Metals Corporation](#) ([TSXV:GEMC](#)) | ([OTC:GBLEF](#)) | ([FSE:5GE1](#)) (“Global Energy Metals”, the “Company” and/or “GEMC”), a company involved in the investment exposure to the battery metals supply chain, is pleased to announce that the Company has been approved to trade its common shares on the OTCQB® Venture Marketplace (the “OTCQB Venture”) under the symbol “GBLEF”. Trading will commence today on the OTCQB.

The OTCQB Venture is a U.S. trading platform that is operated by the OTC Markets Group headquartered in New York. The Company’s common shares will continue to trade on the TSX Venture Exchange under its symbol “GEMC” as well as on the Frankfurt Exchange, under its symbol “5GE1”.

Mitchell Smith, President & CEO commented:

“We have experienced considerable growth in our business over the past year reaching several major accomplishments including the acquisition of several U.S. based battery metal projects. We are looking to continue to carry this momentum forward as we execute on our three-pillar strategy of project exploration and development, peer based collaboration, and accretive M&A. In recognizing the United States is currently seeking domestic

representation for the metals critical to a zero-carbon economy, we believe our multi-jurisdictional U.S. footprint hosting strategic metals such as copper, cobalt, silver and nickel is an important milestone in providing U.S. investors a more accessible opportunity to take part in our growth and see this OTCQB crosstrading as an important occasion in achieving that.”

The OTCQB Market is the premiere marketplace for early stage and developing U.S. and international companies that are committed to providing a high-quality trading and information experience for their U.S. investors. The OTCQB quality standards provide a strong baseline of transparency as well as the technology and regulation to improve the information and trading experience for investors.

Global Energy Metals Corporation

(TSXV:GEMC | OTC:GBLEF | FSE:5GE1)

Global Energy Metals Corp. offers investment exposure to the growing rechargeable battery and electric vehicle market by building a diversified global portfolio of exploration and growth-stage battery mineral assets.

Global Energy Metals recognizes that the proliferation and growth of the electrified economy in the coming decades is underpinned by the availability of battery metals, including cobalt, nickel, copper, lithium and other raw materials. To be part of the solution and respond to this electrification movement, Global Energy Metals has taken a ‘consolidate, partner and invest’ approach and in doing so have assembled and are advancing a portfolio of strategically significant investments in battery metal resources.

As demonstrated with the Company's current copper, nickel and cobalt projects in Canada, Australia, Norway and the United States, GEMC is investing-in, exploring and developing prospective, scaleable assets in established mining and processing jurisdictions in close proximity to end-use markets. Global Energy Metals is targeting projects with low logistics and processing risks, so that they can be fast tracked to enter the supply chain in this cycle. The Company is also collaborating with industry peers to strengthen its exposure to these critical commodities and the associated technologies required for a cleaner future.

Securing exposure to these critical minerals powering the eMobility revolution is a generational investment opportunity. Global Energy Metals believe the the time to be part of this electrification movement.

Cautionary Statement on Forward-Looking Information:

Certain information in this release may constitute forward-

looking statements under applicable securities laws and necessarily involve risks associated with regulatory approvals and timelines. Although Global Energy Metals believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Except as required by law, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.

GEMC's operations could be significantly adversely affected by the effects of a widespread global outbreak of a contagious disease, including the recent outbreak of illness caused by COVID-19. It is not possible to accurately predict the impact COVID-19 will have on operations and the ability of others to meet their obligations, including uncertainties relating to the ultimate geographic spread of the virus, the severity of the disease, the duration of the outbreak, and the length of travel and quarantine restrictions imposed by governments of affected countries. In addition, a significant outbreak of contagious diseases in the human population could result in a widespread health crisis that could adversely affect the economies and financial markets of many countries, resulting in an economic downturn that could further affect operations and the ability to finance its operations.
