

Global Energy Metals Announces Results from Its Annual General Meeting of Shareholders

written by Raj Shah | November 1, 2021

November 1, 2021 ([Source](#)) – Global Energy Metals Corporation ([TSXV:GEMC](#)) ([OTCQB:GBLEF](#)) ([FSE:5GE1](#)) (“Global Energy Metals”, the “Company” and/or “GEMC”), a company involved in investment exposure to the battery metals supply chain, is pleased to advise on the results of its Annual General Meeting of Shareholders (“AGM”) held Friday, October 29, 2021. The AGM was held by telephone conference instead of the typical in-person meeting, in light of the continuing public health impact of the COVID-19 pandemic and considerations regarding the health and safety of employees, shareholders and other stakeholders.

Each resolution and each nominee of the board of directors have been approved by a vast majority of the shares voted.

Resolutions tabled at the AGM as proposed in the Information Circular dated on September 24, 2021, included appointing Dale Matheson Carr-Hilton LaBonte LLP as auditor, fixing the number of board members for the ensuing year at five, and electing the following directors – Erin Campbell, Gaston Reymenants, Peter Reynolds, Paul Sarjeant, and Mitchell Smith, and approving and ratifying the Stock Option Plan as required annually by the policies of the TSX Venture Exchange.

[Global Energy Metals Corporation](#)

(TSXV:GEMC | OTCQB:GBLEF | FSE:5GE1)

Global Energy Metals Corp. offers investment exposure to the growing rechargeable battery and electric vehicle market by building a diversified global portfolio of exploration and growth-stage battery mineral assets.

Global Energy Metals recognizes that the proliferation and growth of the electrified economy in the coming decades is underpinned by the availability of battery metals, including cobalt, nickel, copper, lithium and other raw materials. To be part of the solution and respond to this electrification movement, Global Energy Metals has taken a 'consolidate, partner and invest' approach and in doing so have assembled and are advancing a portfolio of strategically significant investments in battery metal resources.

As demonstrated with the Company's current copper, nickel and cobalt projects in Canada, Australia, Norway and the United States, GEMC is investing-in, exploring and developing prospective, scaleable assets in established mining and processing jurisdictions in close proximity to end-use markets. Global Energy Metals is targeting projects with low logistics and processing risks, so that they can be fast tracked to enter the supply chain in this cycle. The Company is also collaborating with industry peers to strengthen its exposure to these critical commodities and the associated technologies required for a cleaner future.

Securing exposure to these critical minerals powering the eMobility revolution is a generational investment opportunity. Global Energy Metals believe the the time to be part of this

electrification movement.

Cautionary Statement on Forward-Looking Information:

Certain information in this release may constitute forward-looking statements under applicable securities laws and necessarily involve risks associated with regulatory approvals and timelines. Although Global Energy Metals believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Except as required by law, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.

GEMC's operations could be significantly adversely affected by the effects of a widespread global outbreak of a contagious disease, including the recent outbreak of illness caused by

COVID-19. It is not possible to accurately predict the impact COVID-19 will have on operations and the ability of others to meet their obligations, including uncertainties relating to the ultimate geographic spread of the virus, the severity of the disease, the duration of the outbreak, and the length of travel and quarantine restrictions imposed by governments of affected countries. In addition, a significant outbreak of contagious diseases in the human population could result in a widespread health crisis that could adversely affect the economies and financial markets of many countries, resulting in an economic downturn that could further affect operations and the ability to finance its operations.

For more information on Global Energy and the risks and challenges of their businesses, investors should review the filings that are available at www.sedar.com.
