

Global Energy Metals Applies to Trade on the OTCQB to Increase Visibility of its Battery Metals Exposure in the U.S. Capital Markets

written by Raj Shah | June 25, 2021

June 25, 2021 ([Source](#)) – [Global Energy Metals Corporation](#) ([TSXV:GEMC](#)) | ([OTC:GBLEF](#)) | ([FSE:5GE1](#)) (“Global Energy Metals”, the “Company” and/or “GEMC”), a company involved in the investment exposure to the battery metals supply chain, is pleased to announce that it has submitted its application to trade its common shares on the [OTC Venture Market](#) (OTCQB) in the United States.

The company will provide further information once its common shares commence trading on the OTCQB, a U.S. based trading platform operated by the OTC Markets Group of New York.

Mitchell Smith, President & CEO commented:

“We are being attentive to investor demand within a nation that is seeking new investment exposure opportunities to the growing demand for a North American sourced critical material supply chain. This will be a timely milestone for the Company as we continue to grow and develop a multi-jurisdictional U.S. footprint for battery metals such as copper, cobalt and nickel. We believe that the company is in the ideal position to trade on the OTCQB Market and gain the increased visibility that the OTCQB provides.”

Global Energy's stock is currently traded on the [OTC Pink Sheets under the symbol GBLEF](#). The company believes that trading on the OTCQB market will enhance liquidity as well as increase the company's visibility in U.S. capital markets. Global Energy Metals continues to trade on the TSX Venture Exchange under its symbol GEMC as well as on the Frankfurt Exchange, under its symbol 5GE1.

The OTCQB Market is the premiere marketplace for early stage and developing U.S. and international companies that are committed to providing a high-quality trading and information experience for their U.S. investors. The OTCQB quality standards provide a strong baseline of transparency as well as the technology and regulation to improve the information and trading experience for investors.

[Global Energy Metals Corporation](#)

(TSXV:GEMC | OTC:GBLEF | FSE:5GE1)

Global Energy Metals Corp. offers investment exposure to the growing rechargeable battery and electric vehicle market by building a diversified global portfolio of exploration and growth-stage battery mineral assets.

Global Energy Metals recognizes that the proliferation and growth of the electrified economy in the coming decades is underpinned by the availability of battery metals, including cobalt, nickel, copper, lithium and other raw materials. To be part of the solution and respond to this electrification movement, Global Energy Metals has taken a 'consolidate, partner and invest' approach and in doing so have assembled and are advancing a portfolio of strategically

significant investments in battery metal resources.

As demonstrated with the Company's current copper, nickel and cobalt projects in Canada, Australia, Norway and the United States, GEMC is investing-in, exploring and developing prospective, scaleable assets in established mining and processing jurisdictions in close proximity to end-use markets. Global Energy Metals is targeting projects with low logistics and processing risks, so that they can be fast tracked to enter the supply chain in this cycle. The Company is also collaborating with industry peers to strengthen its exposure to these critical commodities and the associated technologies required for a cleaner future.

Securing exposure to these critical minerals powering the eMobility revolution is a generational investment opportunity. Global Energy Metals believe the the time to be part of this electrification movement.

Cautionary Statement on Forward-Looking Information:

Certain information in this release may constitute forward-looking statements under applicable securities laws and necessarily involve risks associated with regulatory approvals and timelines. Although Global Energy Metals believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Except as required by law, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.

GEMC's operations could be significantly adversely affected by the effects of a widespread global outbreak of a contagious disease, including the recent outbreak of illness caused by COVID-19. It is not possible to accurately predict the impact COVID-19 will have on operations and the ability of others to meet their obligations, including uncertainties relating to the ultimate geographic spread of the virus, the severity of the disease, the duration of the outbreak, and the length of travel and quarantine restrictions imposed by governments of affected countries. In addition, a significant outbreak of contagious diseases in the human population could result in a widespread health crisis that could adversely affect the economies and financial markets of many countries, resulting in an economic downturn that could further affect operations and the ability to finance its operations.
