

Global Energy Metals Hosts Webinar to Discuss Battery Metal Exposure, Strengthening of Project Portfolio and Upcoming Catalysts Including Inaugural Drill Program at the Lovelock Cobalt Copper Nickel Project in Nevada

written by Raj Shah | May 7, 2021

May 7, 2021 ([Source](#)) – [Global Energy Metals Corporation](#) ([TSXV:GEMC](#)) ([OTC:GBLEF](#)) ([FSE:5GE1](#)) (“Global Energy Metals”, the “Company” and/or “GEMC”), a company involved in the investment exposure to the battery metals supply chain, is pleased to announce that the Company in collaboration with Amvest Capital, will host a webinar on Monday May 10th at 4:05pm ET / 1:05pm PT.

Global Energy’s President & CEO, Mitchell Smith, will provide highlights of anticipated catalysts, on the heels of [closing \\$870,000 in a first-tranche of its non-brokered private placement](#), aimed in providing shareholders a way to gain accelerated investment exposure to the global energy storage and electrification market opportunity through its growing copper-cobalt-nickel project portfolio in the world’s top mining jurisdictions.

This will be a live, interactive online event where investors

are invited to ask the company questions in real-time. If attendees are not able to join the event live on the day of the conference, an archived webcast will also be made available after the event.

Details to register for the webinar are below.

DATE: Monday May 10th, 2021

TIME: 1:05pm PDT / 4:05pm EDT

REGISTER FREE: [The Amvest Capital – Global Energy Metals Webinar](#)

The Amvest Capital webinar will be held on Monday May 10th @ 4:05 pm ET/ [1:05 pm PT](#). To view the Amvest webinar live, [please register here](#).

Global Energy Metals is developing a strong, diversified portfolio of strategic battery mineral projects that are well positioned for further exploration and development at a time when there is renewed interest in the battery minerals sector as price fundamentals are realigning due to the much anticipated surge in demand and market growth that is supported by a global movement towards electric vehicle and new energy storage adoption.

Global Energy Metals' current portfolio of cobalt, copper and nickel holdings is well exposed to this global transition towards a lower-carbon economy.

About Amvest Capital

Amvest Capital is a New York-based specialist investment management and corporate finance firm focused solely on the natural resources sector. You can learn more about Amvest Capital and its webinars at <https://www.amvestcapital.com/webinars>.

[**Global Energy Metals Corporation**](#)

(TSXV:GEMC | OTC:GBLEF | FSE:5GE1)

Global Energy Metals Corp. offers investment exposure to the growing rechargeable battery and electric vehicle market by building a diversified global portfolio of exploration and growth-stage battery mineral assets.

Global Energy Metals recognizes that the proliferation and growth of the electrified economy in the coming decades is underpinned by the availability of battery metals, including cobalt, nickel, copper, lithium and other raw materials. To be part of the solution and respond to this electrification movement, Global Energy has taken a 'consolidate, partner and invest' approach and in doing so have assembled and are advancing a portfolio of strategically significant investments in battery metal resources.

As demonstrated with our current copper, nickel and cobalt projects in Canada, Australia, Norway and the United States, we're investing-in, exploring and developing prospective, scaleable assets in established mining and processing jurisdictions in close proximity to end-use markets. We're targeting projects with low logistics and processing risks, so that they can be fast tracked to enter the supply chain in this cycle. We're also collaborating with industry peers to strengthen our exposure to these critical commodities and the associated technologies required for a cleaner future.

Securing exposure to these critical minerals powering the eMobility revolution is a generational investment opportunity. We believe the the time to be part of this electrification movement.

GEMC's operations could be significantly adversely affected by the effects of a widespread global outbreak of a contagious disease, including the recent outbreak of illness caused by COVID-19. It is not possible to accurately predict the impact COVID-19 will have on operations and the ability of others to meet their obligations, including uncertainties relating to the ultimate geographic spread of the virus, the severity of the disease, the duration of the outbreak, and the length of travel and quarantine restrictions imposed by governments of affected countries. In addition, a significant outbreak of contagious

diseases in the human population could result in a widespread health crisis that could adversely affect the economies and financial markets of many countries, resulting in an economic downturn that could further affect operations and the ability to finance its operations.
