

Goldplay Announces Frankfurt Stock Exchange Listing

written by Raj Shah | January 16, 2019

January 16, 2019 ([Source](#)) – **Goldplay Exploration Ltd. (TSXV: GPLY, FRANKFURT: GPE OTCQB: GLYXF)** (“Goldplay” or the “Company”) is pleased to announce the listing of its shares on the Frankfurt Stock Exchange under the symbol GPE

effective January 15, 2019.

The Frankfurt Stock Exchange is third in terms of volume behind New York and NASDAQ, and it will provide Goldplay access to a broader investment audience in Germany and Europe. The Company is currently listed on the TSX Venture Exchange in Canada and the OTCQB in the United States.

Goldplay President and CEO Marcio Fonseca commented, “Goldplay is committed to building shareholder value and the Frankfurt Stock Exchange listing will enable international investors to participate in the Company’s growth and development”.

About Goldplay Exploration Ltd.

Goldplay owns a >250 sq. km exploration portfolio in the historical Rosario Mining District, Sinaloa, Mexico. Goldplay’s current exploration focus includes surface exploration and drilling, with a resource update to follow at the advanced-stage San Marcial Project and follow up exploration program at the El Habal Project.

The San Marcial land package consists of 1,250 ha, located south

of the La Rastra and Plomosas historical mines and 20 km from the Company's 100% owned El Habal Project in the Rosario Mining District, Sinaloa, Mexico. San Marcial is an attractive, near-surface high-grade silver, lead and zinc project for which a historical resource estimate has been previously disclosed.

San Marcial exhibits significant exploration upside supported by regional exploration programs completed by previous operators who identified 14 exploration targets similar to San Marcial within its 100% Goldplay-owned concessions. Some of these exploration targets consist of old shallow pits, caved shafts and historical underground workings in areas with extensive hydrothermal alteration, hosted by major regional structures.

The El Habal Project is a drilling stage project with an ongoing drill program. The oxidized gold mineralized zone outcrops along a series of rolling hills with evidence of historical shallow underground mining along a 6 km long prospective corridor. The El Habal Project is located near the historical gold-silver Rosario Mine which reportedly operated for over 250 years. Goldplay's team has over 30 years of experience with senior roles in exploration, financing, and development in the mining industry, including over ten years of extensive exploration experience in the Rosario Mining District, leading to previous successful discoveries. A current NI 43-101 report on the El Habal Project is filed on SEDAR.
