

# Granada Announces Private Placement

written by Raj Shah | September 12, 2019

September 11, 2019 ([Source](#)) – **Granada Gold Mine Inc. (TSX.V: GGM)** (“Granada Gold” or the “Company”) announces a non-brokered private placement offering of 2,200,000 units (“Units”) at a price of \$0.10 per Unit for gross proceeds of up to \$220,000. Each Unit is comprised of one common share of the Company and one share purchase warrant. Each whole warrant will entitle the holder thereof to purchase one additional common share of the Company at an exercise price of \$0.15 per share, for a period of two years from closing, subject to TSX Venture Exchange (“Exchange”) approval.

The proceeds of the Private Placement will be used for surface exploration, trenching, and historical resampling of drill core on the Company’s Granada Gold Property in Québec and for general working capital purposes.

All securities issued in connection with the private placement are subject to a four month and a day hold period in accordance with applicable Securities Laws.

## **About Granada Gold Mine Inc.**

Granada Gold Mine Inc. continues to develop the Granada Gold Property near Rouyn-Noranda, Quebec. Approximately 120,000 meters of drilling has been completed to date on the property, focused mainly on the extended LONG Bars zone which trends 2 kilometers east-west over a potential 5.5 kilometers of mineralized structure.

The highly prolific Cadillac Break, the source of more than 75

million plus ounces of gold production in the past century, cuts through the north part of the Granada property.

Pit-Constrained Mineral Resources at Granada disclosed on February 13<sup>th</sup>, 2019 Press Release prepared by SGS independent QP stand at:

Category	Tonnes	Grade (g/t Au)	Contained Au (oz)
Measured	12,637,000	1.02	413,000
Indicated	9,630,000	1.13	349,000
<b>Measured &amp; Indicated</b>	<b>22,267,000</b>	<b>1.06</b>	<b>762,000</b>
Inferred	6,930,000	2.04	455,000

Mineral resources which are not mineral reserves do not have demonstrated economic viability. An Inferred Mineral Resource has a lower level of confidence than that applying to a Measured and Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration.

+ Open pit mineral resources are reported at a cut-off grade of 0.4 g/t Au within a conceptual pit shell. Cut-off grades are based on a gold price of US\$1,300 per ounce, a foreign exchange rate of US\$0.76, and a gold recovery of 95%.

The Company is in possession of a mining permit required to commence the initial mining phase, known as the “Rolling Start”, which allows the company to mine up to 550 tonnes per day. Additional information is available at [www.granadagoldmine.com](http://www.granadagoldmine.com).
