

Greenland Mines Shares Begin Trading on Xetra in Germany

written by Raj Shah | October 19, 2026

- *Nasdaq-listed critical-minerals developer extends trading access to Deutsche Börse's primary electronic marketplace*
- *Xetra network connects trading participants across Europe, Hong Kong and the Middle East, broadening Greenland Mines' institutional and retail reach beyond North America*
- *No new primary listing; Greenland Mines remains a U.S. domestic issuer with Nasdaq as its principal market*

October 19, 2026 ([Source](#)) – [Greenland Mines Ltd](#) (“Greenland Mines” or the “Company”) (Nasdaq: GRML; FSE: HK6), a Greenland-focused critical-minerals developer, today announced the start of trading of its common stock on Xetra, the electronic trading system of Deutsche Börse AG in Germany (ISIN: US49876K2024, WKN: A41A0Y, FSE: HK6). MWB Fairtrade AG, as designated sponsor, will support trading in Greenland Mines’ shares on Xetra with immediate effect, with the objective of contributing to increased liquidity and higher turnover.

Bo Møller Stensgaard, Ph.D., President of Greenland Mines, commented: “Trading on Xetra is a logical step in building Greenland Mines’ presence in global capital markets. Our projects sit at the center of Europe’s critical raw materials agenda, and Xetra is the reference market through which German and wider European institutions access equities. Importantly, the Xetra network extends well beyond Europe: trading participants are connected from Hong Kong and the United Arab Emirates, and through those participants investors across Asia and the Middle East can access our shares in euros during

European trading hours. Together with our Nasdaq listing, this gives Greenland Mines a trading footprint across North America, Europe, Asia and the Gulf. We expect this to broaden our shareholder base, enhance liquidity and support more transparent price discovery for the benefit of all stockholders.”

Why Xetra

While Greenland Mines’ shares have already been available to German retail investors through venues such as Tradegate, Frankfurt, Munich, and Gettex, Xetra is Deutsche Börse’s primary electronic trading platform and the reference market used by most German institutional investors. The Xetra listing broadens Greenland Mines’ potential investor base by making the Company accessible to institutional investors whose mandates restrict them to trading on regulated, highly liquid exchanges, and by placing the Company’s shares in the same open, central order book used for German blue-chip equities and the European ETF market.

A global, not only European, investor gateway

Xetra is operated as a fully electronic, pan-European marketplace, but its participant network is international. According to Deutsche Börse, roughly half of Xetra’s trading participants are located outside Germany, and the network includes admitted participants in the United Kingdom, Switzerland, the Netherlands, France and other European financial centers, as well as in Hong Kong and the United Arab Emirates. Through these participants and their client networks, Greenland Mines’ shares become directly tradable for:

- European institutional investors – asset managers, pension funds and insurers in Germany, the United Kingdom, Switzerland, the Nordics, Benelux and France that use

Xetra as their reference market for euro-denominated equity execution;

- European retail investors – through German and other European online brokers and banks that route orders to Xetra, in euros, with no need to open a U.S. brokerage account or trade in U.S. dollars;
- Asian and Greater China investors – through Deutsche Börse's international trading network, including Asian market participants, and its longstanding partnership with the Shanghai Stock Exchange and China Financial Futures Exchange through CEINEX, a Frankfurt-based joint venture facilitating China- and RMB-related investment products;
- Middle East and Gulf investors – via Xetra participants admitted from the United Arab Emirates, giving sovereign, institutional and family-office capital in the Gulf a regulated, euro-denominated route into the Company's shares during European hours, in addition to Nasdaq.

For investors in Asia and the Middle East in particular, Xetra's trading hours overlap with the business day in Dubai, Abu Dhabi, Riyadh, Hong Kong and Shanghai for a substantially longer window than U.S. market hours, improving the practical accessibility of Greenland Mines' shares to those investors.

This is not a new primary listing and does not change Greenland Mines' status as a Nasdaq-listed, SEC-reporting U.S. issuer. Nasdaq remains the Company's principal trading market, and the Company will continue to be governed by U.S. federal securities laws and Nasdaq listing rules. Trading on Xetra is in euros and is settled through Clearstream.

About Greenland Mines Ltd

Greenland Mines Ltd is listed on Nasdaq and develops mineral assets in Greenland, including the Skaergaard precious-metals project in southeast Greenland and the Sarfartoq neodymium-

praseodymium rare earths project in southwest Greenland. Its North Atlantic Critical Metals Corridor strategy seeks to connect Greenland resources with processing capacity and industrial customers in the United States and allied countries. The Company's portfolio also includes a strategic investment in AnorTech, which is developing alumina and other materials from Greenland anorthosite.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements are often identified by words such as "believe," "expect," "anticipate," "intend," "plan," "potential," "could," "may," "will," "should," "estimate," "objective" and similar expressions.

Forward-looking statements are based on current expectations and assumptions and are subject to risks and uncertainties. Many factors could cause actual results to differ materially, including exploration, resource-estimation, metallurgical, engineering, environmental, social, permitting, logistical, infrastructure, financing, commodity-price, market, counterparty and execution risks; the availability and level of participation of advisory board members; changes to planned programs and timelines; the Company's ability to obtain required approvals and financing; and risks described in documents filed or to be filed with the U.S. Securities and Exchange Commission. No assurance can be given that studies, applications, partnerships, transactions, development decisions or production will occur on the timing contemplated or at all.

Readers should carefully consider these factors and the other risks and uncertainties described in the Company's SEC filings. All information in this press release is provided as of its date, and the Company undertakes no obligation to update any

forward-looking statement except as required by applicable law.
