

Ideanomics to Give Keynote Presentation at 2021 MOVE America

written by Raj Shah | September 21, 2021
September 21, 2021 ([Source](#)) –

- Company to showcase technologies from WAVE and Energica at a global event for mobility innovators
- WAVE CEO Aaron Gillmore to give Bus Transportation Keynote Presentation on overcoming fleet electrification barriers with wireless charging
- WAVE CTO Michael Masquelier to present on the Truck Tech panel to improve safety, efficiency and sustainability in trucking
- Energica's EVA Ribelle electric motorcycle will be present at Ideanomics' booth #401

[Ideanomics](#) (NASDAQ: IDEX) today announced its participation and display at [MOVE America](#), a showcase event for urban mobility discussions and solutions, being held September 28-30, in Austin, Texas at the Palmer Events Center.

WAVE CEO Aaron Gillmore will give a keynote presentation on the topic of overcoming fleet electrification barriers with wireless charging for the Bus Transportation theater on September 28 at 10:40am CT.

At 1:00pm CT that same day, Gillmore and Kate Lam, Ideanomics' Managing Director of Financial Products, will lead a roundtable discussion on fleet electrification challenges, to discuss how WAVE's high-power wireless charging and Ideanomics' vertically integrated EV solutions are removing critical adoption barriers

in mass transit, like range extension, total cost of ownership reduction and infrastructure scalability.

WAVE CTO Michael Masquelier is participating in a Truck Tech Panel “Technological developments improving safety, efficiency and sustainability in trucking” on September 28 at 2:55pm CT.

- [WAVE](#), wireless charging provider enabling commercial fleet operators with a faster, easier way to extend the range of medium- and heavy-duty electric vehicles with systems ranging from 125kW to 500kW, and a 1MW charger in development. Across the U.S., from Washington to Florida, mass transit agencies use WAVE technology for their revenue service buses, many for more than five years. Ports use the technology for cargo handling, while commercial warehouse and distribution companies use the inductive charging technology to charge their freight distribution vehicles.
- [Energica](#) is the first Italian manufacturer and global distributor of high-performance supersport electric motorcycles and is the sole manufacturer for the FIM Enel MotoE™ World Cup. Each Energica electric motorcycle is unique in its class for their technical solutions and innovations, making them the ultimate expression of Italian luxury. Energica announced this week their plans to more than double their footprint in the United States by the end of 2021, supported by their partnership with Ideanomics Mobility and Capital divisions.

“MOVE is an opportunity for Ideanomics and our operating companies like Energica and WAVE to talk more about the things we are doing in the fleet electrification space that matter,” said Alf Poor, CEO of Ideanomics. “Our recently announced acquisition of VIA will help us in creating a complete solution around infrastructure, vehicle and financing, and the expansion

of the Energic dealership footprint involves a program that we can use for both VIA and our Solectrac electric tractors. WAVE's inductive charging solution not only works today for transit, ports and commercial applications but also enables the autonomous revolution when it arrives. It's exciting to see how these will all work together in a more sustainable ecosystem."
