May 31, 2018 ([Source](#)) – Largo Resources Ltd. (“Largo” or the “Company”) (TSX: [LGO](#)) (OTCQX: LGORF) reports that operations at its Maracás Menchen Mine have been minimally impacted by the national truckers’ strike in Brazil which was

settled as of May 30, 2018. Production is scheduled to restart as early as May 31, 2018. Until recently, the Company had been able to utilize its supplies of consumables and various intermediary stockpiles that it had accumulated at the Maracás Menchen Mine to enable it to continue operations. However, the national truckers’ strike resulted in the Company temporarily suspending production for four days.

Largo has used the downtime to complete maintenance across the plant, including replacing the flaking wheel, assessing the furnace refractory, changing the de-ammoniator wires in the fusion section and completing minor repairs to the kiln and cooler refractory.

To date, there has been no material financial impact as a result of the strike. Further updates to the market will be provided upon any material development.
