

Lewis Black of Almonty Industries to Headline CMI Summit 5 with Stark Warning on the Critical Minerals Talent Crisis

written by Raj Shah | May 8, 2026

May 8, 2026 – TORONTO, ONTARIO – As governments across the West race to secure critical minerals supply chains amid rising geopolitical instability, one challenge is rapidly emerging as an existential threat to industrial execution: the global shortage of skilled mining and metallurgical talent.

Against this backdrop, Lewis Black, President, CEO & Chairman of [Almonty Industries Inc.](#) (NASDAQ: ALM | TSX: AII | ASX: AII), will deliver a featured keynote presentation at [CMI Summit 5: “The New Critical Minerals Economy,”](#) taking place May 13–14, 2026, at the Historic National Club in Toronto. Mr. Black’s keynote presentation is scheduled for Thursday, May 14, 2026, from 1:15–1:35 PM and is titled: **“No Team, No Tungsten, No Time: Mining’s Human Capital Crisis”**.

Widely regarded as one of the most strategically minded executives in the global tungsten and critical minerals sector, Mr. Black is expected to address the growing disconnect between government ambition and industrial execution capacity. His remarks will examine how shortages in engineering talent, technical trades, permitting expertise, metallurgy, and mine development leadership are increasingly becoming the defining bottlenecks in the race to rebuild Western supply chains.

At a time when the United States and its allies are urgently attempting to reduce dependence on China for critical minerals—including tungsten, rare earths, antimony, and other military metals—Mr. Black is expected to argue that the battle will not be won by policy announcements alone, but by the ability to train, attract, and retain the next generation of industrial leadership.

“Governments can announce strategies, and capital markets can finance projects, but without people capable of building and operating mines, processing facilities, and downstream manufacturing systems, none of it matters,” said Lewis Black, President, CEO & Chairman of Almonty Industries Inc. “The West spent decades hollowing out its industrial knowledge base. Rebuilding critical minerals supply chains now requires more than money—it requires rebuilding expertise, discipline, technical capability, and long-term industrial thinking.”

Mr. Black has become one of the most recognized voices in the global tungsten industry through Almonty Industries’ advancement toward becoming one of the leading non-Chinese tungsten producers in the world. Under his leadership, the Company has advanced the Sangdong Tungsten Mine in South Korea—widely viewed as one of the most strategically important tungsten projects outside China—as governments increasingly prioritize resilient defense and industrial supply chains.

[Critical Minerals Institute](#) (CMI) Co-Chair Jack Lifton emphasized the importance of Mr. Black’s participation at this year’s summit:

“Lewis Black represents something increasingly rare in today’s critical minerals sector—an executive who understands not only markets and finance, but also the operational realities of building strategic industrial capacity. The next phase of the

critical minerals economy will not be determined by who gives the best speeches. It will be determined by who can execute, build, train, and operate at scale. Lewis understands that better than most.”

In addition to his keynote presentation, Mr. Black will also participate in Panel 8: “The Endgame – Who Will Control the Critical Minerals Economy?”, taking place Thursday, May 14, 2026, from 4:00–4:50 PM alongside senior industry leaders and policymakers examining the geopolitical restructuring of global mineral supply chains.

[CMI Summit 5](#) – “The New Critical Minerals Economy” – will convene leading executives, institutional investors, government representatives, defense stakeholders, and technical experts from across the critical minerals ecosystem to address the growing intersection of resource security, industrial policy, capital formation, and geopolitical power.

As governments increasingly recognize that control of critical minerals supply chains may define the next industrial era, Mr. Black’s keynote is expected to be one of the summit’s most anticipated discussions.

About Almonty Industries Inc.

Almonty Industries Inc. (NASDAQ: ALM | TSX: AII | ASX: AII) is a global producer of tungsten concentrate, primarily involved in the mining, processing, and shipping of tungsten concentrate from its Los Santos Mine in western Spain and its Panasqueira mine in Portugal, as well as the development of its Sangdong tungsten mine in South Korea and the Valtreixal tin/tungsten project in northwestern Spain. Almonty is positioning itself as a cornerstone supplier of secure, non-Chinese tungsten supply for Western industrial, aerospace, semiconductor, and defense markets.

About the Critical Minerals Institute (CMI):

The [Critical Minerals Institute](https://www.criticalmineralsinstitute.com) (CMI) is a global think tank for the critical minerals economy, serving as a central hub that connects companies, capital markets, and policymakers, and delivering actionable intelligence through its monthly CMI Masterclasses, weekly Critical Minerals Report (CMR), bespoke research, and board-level advisory services across exploration finance, supply chains, and geopolitics. CMI also organizes its flagship Annual Critical Minerals Institute Summit, a global gathering of government leaders, institutional investors, and industry executives, with the upcoming CMI Summit 5 – “The New Critical Minerals Economy” – scheduled for May 13–14 in Toronto, Canada. For more information, please contact Chrissy Hessam, Director, Membership Services, at Chrissy@criticalmineralsinstitute.com or +1 647 289 7714, or visit [CriticalMineralsInstitute.com](https://www.CriticalMineralsInstitute.com).
