

Loan Settlement, Equity Issue & Total Voting Rights

written by Raj Shah | April 4, 2025

April 4, 2025 ([Source](#)) – Further to the announcement made on 12 March 2025 (RNS 3848A) Panther Metals PLC (LSE:PALM) the company focused on mineral exploration in Canada, will allot, issue, and admit to listing, a combined total of 362,250 shares at an issue price 50p (the “**Settlement Shares**”) and deliver 362,250 warrants with an exercise price of 75p to the former holders of the loan notes. The warrants will have a life of 3 years and be subject to an “accelerator” requiring the warrants to be exercised should the Panther share price exceed £1.50 at any time over a period of 20 trading days following the date of the issue of the warrants.

Authority to issue the Settlement Shares and the shares underlying the warrants was approved by shareholders on 2 April 2025.

When issued, the Settlement Shares will be credited as fully paid and will rank pari passu in all respects with the existing Ordinary Shares in the share capital of the Company, including the right to receive all dividends and other distributions declared, made, or paid on or in respect of such shares after the date of issue of the Settlement Shares.

Application will be made to the Financial Conduct Authority (“FCA”) for admission of the Settlement Shares to the equity shares (transition) category of the Official List maintained by the FCA and to the London Stock Exchange (the “LSE”) for admission to trading of the Consideration Shares on the LSE’s Main Market for listed securities (together “Admission”). It is expected that Admission will take place at 8.00 a.m. on 8 April

2025 and that dealings in the Consideration Shares on the LSE's Main Market for listed securities will commence at the same time.

Total Voting Rights

Following Admission, the Company's total issued share capital consists of 5,593,400 Ordinary Shares. The Company does not hold any Ordinary Shares in treasury.

Therefore, following Admission, the total number of voting rights in Panther Metals plc is 5,593,400. This figure may be used by shareholders as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change in their interest in, the Company under the FCA's Disclosure Guidance and Transparency Rules.

Notes to Editors

Panther Metals PLC is an exploration company listed on the main market of the London Stock Exchange. Panther is focussed on the discovery of commercially viable mineral deposits. The Company's operational focus is on established mining jurisdictions with the capacity for project scalability. Drill targets are assessed rapidly utilising a combination of advanced technologies and extensive geological data to decipher potential commercial viability and act accordingly. Panther's current geological portfolio comprises of three highly prospective properties in Ontario, Canada.

Obonga Project

Panther Metals acquired the Obonga Greenstone Belt in July 2021 and have already identified five prospective primary targets: Wishbone, Awkward, Survey, Ottertooth and Silver Rim. A successful Phase 1 drilling campaign at Wishbone in Autumn 2021 revealed the presence of significant VMS-style mineralised systems on the property – the first such discovery across the entire greenstone belt. Intercepts include 27.3m of massive sulphide in hole one, and 51m of sulphide-dominated mineralisation in hole two. Both drill holes contained multiple lenses. Anomalous high-grade copper in lake sediment close to the target area has also been identified, increasing confidence in the prospectivity of the location.

Awkward is a highly anomalous magnetic target, interpreted to be a layered mafic intrusion and magmatic conduit based on mapped geology and airborne geophysics. Historic sampling in the area returned anomalous platinum and palladium (Pt, Pd) values, while historic drilling on the periphery of the target intersected non-assayed massive sulphide and copper (assumed to be chalcopyrite), non-assayed disseminated pyrite and chalcopyrite

in coarse gabbro, and non-assayed 'marble cake' gabbro (matching the description of the Lac des Iles Mine varitexture gabbro ore zone).

Two additional named targets, Survey and Ottertooth, both displays further coincident magnetic and electromagnetic anomalies and are adjacent to the contact between intrusive and extrusive mafic rocks. Historic drilling at Survey intersected several meters of massive sulphides in multiple intersections (main parts of the anomaly remain untested) while Ottertooth remains untested in its entirety.

Dotted Lake Project

Panther Metals acquired the Dotted Lake Project in July 2020, it is situated approximately 16km from Barrick Gold's renowned Hemlo Gold Mine. An extensive soil programme conducted in 2021 identified numerous gold and base metal targets, all within the same geological footprint. Following the installation of a new trail providing direct access to the target location, an initial drilling programme in Autumn 2021 confirmed the presence of gold mineralisation within this system with anomalous gold continuing along strike and present within the surrounding area.

Fulcrum Metals Plc

Fulcrum Metals PLC (LON: FMET) is an AIM listed exploration company which finances and manages exploration projects focused on Canada, widely recognised as a top mining jurisdiction.

Fulcrum's strategy is to focus on discovery and commercialisation of its Projects through targeted exploration programmes. The primary focus is to make an economic discovery on the flagship Schreiber-Hemlo Properties and establishing the prospectivity of its wider Ontario and Saskatchewan portfolio

with a view to securing potential joint venture and/or acquisition interest.

Panther Metals Plc own 12.38% of the issued share capital of Fulcrum Metals Plc and a 2% NSR on the Big Bear project.

Conclusion

Panther Metals understand that the commercial realities of building an exploration company requires expertise in geology, finance, and the markets within which they operate. The Company's extensive network of industry leaders allows it to meet these objectives. Ultimately however, drilling success is the only route to discovery: the fundamental objective of any exploration company. Once Panther's world-class geological team identify the anomalies, they work hard to get drilling. The drill hole is the only place where substantial and sustained capital growth originates and it's with that operational focus Panther Metals will continue to advance.
