

Nano One Announces Launch Of Early Warrant Exercise Incentive Program

written by Raj Shah | July 31, 2019

July 31, 2019 ([Source](#)) – Nano One Materials Corp. (**TSXV: NNO**) (**OTC Pink: NNOMF**) (**FSE: LBMB**) (“Nano One” or the “Company”) is pleased to announce a warrant exercise incentive program (the “Program”) designed to encourage the early exercise of up to

1,650,000 of its outstanding unlisted warrants (the “Warrants”) exercisable for common shares of the Company (“Common Shares”). The Warrants are currently exercisable at a price of CAD \$1.25 per Common Share until September 8, 2019.

The Program will commence August 8, 2019, at 9:00 a.m. PDT and expire on August 23, 2019, at 5:00 p.m. PDT (the “Early Exercise Period”). Under the Program, the Company is offering an inducement to each Warrant holder that exercises their Warrants prior to August 23, 2019 (the “Early Exercise Expiry Date”), by the issuance of one additional share purchase warrant for each warrant early exercised. Each new warrant (the “Incentive Warrant”) will entitle the holder to purchase one additional Common Share for a period of 14 months from the date of issuance of such Incentive Warrant, at a price of CAD \$1.60. The Incentive Warrants will be subject to a four month hold period from the date of issuance.

The Incentive Warrants are subject to an accelerated expiry if the volume weighted average price of the common shares is greater than or equal to CAD \$2.00 for any 10 consecutive

trading days and, if the Company has given notice, the Incentive Warrants will expire 30 days following the date of such notice.

If all of the Warrants are exercised during the Early Exercise Period, Nano One would:

- receive gross proceeds of CAD \$2,062,500 million on or before the Early Exercise Expiry Date;
- issue 1,650,000 common shares pursuant to the exercise of the Warrants by holders in accordance with the original terms of the Warrants; and
- issue 1,650,000 Incentive Warrants to Warrant holders pursuant to the early exercise of the Warrants on or before the Early Exercise Expiry Date.

The terms and conditions of the Program and the method of exercising Warrants pursuant to the Program will be set forth in a letter to be mailed to the registered address of each Warrant holder which will be posted on SEDAR.

Holders of Warrants who elect to participate in the Program will be required to deliver the following to the Company on or prior to 5:00 p.m. PDT on August 23, 2019:

1. a duly completed and executed Exercise Form, in the form which accompanies the certificate representing the Warrants;
2. the original certificate representing the Warrants being exercised; and
3. the applicable aggregate exercise price payable to the Company by way of certified cheque, money order, bank draft, or wire transfer in lawful money of Canada.

To the extent that holders of the Warrants take advantage of the opportunity to exercise their Warrants early, this will strengthen Nano One's current cash position.

The transaction is subject to the receipt of all final regulatory approvals, including the approval of the TSX Venture Exchange. Any Warrants that are not exercised prior to the Early Exercise Expiry Date will remain outstanding and continue to be exercisable for Common Shares on their existing terms.

The Warrants were originally issued by the Company as part of a unit of the Company in connection with a private placement financing completed on September 8, 2017. The underlying Common Shares and Incentive Shares to be issued pursuant to the exercise of the Warrants have not been, and will not be, registered under the U.S. Securities Act or any U.S. state securities laws, and may not be offered or sold in the United States or to, or for the account or benefit of, United States persons absent registration or any applicable exemption from the registration requirements of the U.S. Securities Act and applicable U.S. state securities laws. This press release does not constitute an offer to sell or the solicitation of an offer to buy securities in the United States, nor in any other jurisdiction

About Nano One

Nano One Materials Corp (“Nano One” or “the Company”) has developed patented technology for the low-cost production of high performance lithium ion battery cathode materials used in electric vehicles, energy storage and consumer electronics. The processing technology enables lower cost feedstocks, simplifies

production and advances performance for a wide range of cathode materials. Nano One has built a demonstration pilot plant and is partnering with global leaders in the lithium ion battery supply chain, to advance its NMC, LFP and LMN cathode technologies for large growth opportunities in e-mobility and renewable energy storage applications.

Nano One's pilot and partnership activities are being funded with the assistance and support of the Government of Canada through Sustainable Development Technology Canada (SDTC) and the Automotive Supplier Innovation Program (ASIP) a program of Innovation, Science and Economic Development Canada (ISED). Nano One also receives financial support from the National Research Council of Canada Industrial Research Assistance Program (NRC-IRAP). Nano One's mission is to establish its patented technology as a leading platform for the global production of a new generation of battery materials. www.nanoone.ca
