

Nano One Chairman Awarded Entrepreneur of the Year

written by Raj Shah | October 1, 2018

✖ October 1, 2018 ([Source](#)) – Nano One Materials Corp. (TSXV: NNO) (OTC-Nasdaq Intl Designation: NNOMF) (Frankfurt: LBMB) announces that Nano One Chairman, Paul Matysek, was awarded Ernst and Young's 2018 Entrepreneur of the Year for Mining and Resources.

Mr. Matysek said *"I am very excited and humbled by receiving this prestigious award. I have made a career of providing the necessary inputs in support of the electric vehicle revolution. I am more confident than ever that Nano One's management, scientific team and ground-breaking technology will be integral in the development of future battery solutions."*

Dan Blondal, Nano One CEO, said *"Paul's proven entrepreneurial experience is a great asset to Nano One, especially now, at a pivotal stage in our growth and development."*

On a different note, Ms. Tammy Gillis, Nano One's CFO, has resigned to pursue an opportunity closer to home, after completing an orderly transition of her day to day responsibilities to Nano One's full time controller, Ms. Susan Pan, CPA, CMA, MBA. Mr. John Lando, Founder and President of Nano One, has taken on the role of interim CFO, effective October 1, 2018.

"On behalf of everyone at Nano One," said Mr. Blondal, "I would like to thank Tammy for her many years' service and we wish her every success in her future endeavors. She has left us with solid accounting practices for the execution of our business plans and going

forward, we welcome John's financial leadership."

Nano One Materials Corp.

Dan Blondal, CEO

About Nano One:

Nano One Materials Corp ("Nano One" or "the Company") is developing patented technology for the low-cost production of high-performance battery materials used in electric vehicles, energy storage, consumer electronics and next generation batteries. The processing technology addresses fundamental supply chain constraints by enabling wider raw materials specifications for use in lithium ion batteries. The process can be configured for a range of different nanostructured materials and has the flexibility to shift with emerging and future battery market trends and a diverse range of other growth opportunities. The novel three-stage process uses equipment common to industry and Nano One has built a pilot plant to demonstrate high volume production, provide larger volumes of material for third party testing and has preliminary engineering plans in place for full scale production of a range of cathode materials. This pilot plant program is being funded with the assistance and support of the Government of Canada through Sustainable Development Technology Canada (SDTC) and the Automotive Supplier Innovation Program (ASIP) a program of Innovation, Science and Economic Development Canada (ISED). Nano One also receives financial support from the National Research Council of Canada Industrial Research Assistance Program (NRC-IRAP). Nano One's mission is to establish its patented technology as a leading platform for the global production of a new generation of nanostructured composite materials. Certain information contained herein may constitute "forward-

looking information" under Canadian securities legislation. Forward-looking information includes, but is not limited to, statements with respect to the actual receipt of the grant monies, the execution of the Company's plans which are contingent on the receipt of such monies and the commercialization of the Company's technology and patents. Generally, forward-looking information can be identified by the use of forward-looking terminology such as 'believe', 'expect', 'anticipate', 'plan', 'intend', 'continue', 'estimate', 'may', 'will', 'should', 'ongoing', or variations of such words and phrases or statements that certain actions, events or results "will" occur. Forward-looking statements are based on the opinions and estimates of management as of the date such statements are made and they are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking statements or forward-looking information. Although management of the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements and forward-looking information. The Company does not undertake to update any forward-looking statements or forward-looking information that is incorporated by reference herein, except as required by applicable securities laws.
