

Nano One Provides Update on Joint Projects with Saint-Gobain

written by Raj Shah | August 4, 2021

August 4, 2021 ([Source](#)) – Nano One® Materials Corp. (TSX: NANO) (OTC Pink: NNOMF) (FSE: LBMB) (“Nano One”) is a technology company with a patented and scalable industrial process for the production of low cost, low environmental footprint and high-performance cathode powders used in lithium-ion batteries.

Nano One’s Chief Technology Officer, Dr. Stephen Campbell, is pleased to announce the successful completion of its joint development project with Saint-Gobain. This project began in December 2018 and focused on optimization of the thermal processing of Nano One produced cathode materials and Saint-Gobain’s furnace materials under a range of firing conditions. Success on this project has paved the way for additional collaborative opportunities that are currently under consideration.

“This project has provided valuable insight on thermal processing conditions for various cathode materials and furnace materials,” said Stephen Campbell. *“We have developed thermal processing expertise to optimize the performance of cathode materials and throughout the project, we have shared a collaborative and open relationship with our colleagues at Saint-Gobain. Potential future work will build on those outcomes, add manufacturing know-how and enhance the value of our process technology and business offerings.”*

Saint-Gobain remains a consortium member within Nano One’s “Scaling Advanced Battery Materials” project supported by

Sustainable Development Technology Canada (“SDTC”) and the British Columbia Innovative Clean Energy (“ICE”) fund.

Mr. Natesh Krishan, General Manager of Engineered Ceramics of Saint-Gobain, said, *“Our product development teams have made good progress in the evaluation of the thermal aspects of cathode material synthesis. The partnership with Nano One has been important to Saint-Gobain through advancing our understanding of the cathode material firing process to allow an enhanced product offering to better serve this market.”*

Having built a positive working relationship over the past 2 years, Nano One and Saint-Gobain are discussing the scope of work for additional joint projects and will continue to explore future business and co-development opportunities.

About Saint-Gobain

Saint-Gobain designs, manufactures and distributes materials and solutions which are key ingredients in the wellbeing of each of us and the future of all. They can be found everywhere in our living places and our daily life: in buildings, transportation, infrastructure and in many industrial applications. They provide comfort, performance and safety while addressing the challenges of sustainable construction, resource efficiency and climate change. Saint-Gobain had €40.8 billion in sales in 2017, operates in 67 countries and has more than 179,000 employees. www.saint-gobain.com

About Nano One

Nano One Materials Corp. is a clean technology company with a patented, scalable and low carbon intensity industrial process for the low-cost production of high-performance lithium-ion battery cathode materials. The technology is applicable to electric vehicle, energy storage, consumer electronic and next

generation batteries in the global push for a zero-emission future. Nano One's One-Pot process, its coated nanocrystal materials and its Metal to Cathode Active Material (M2CAM) technologies address fundamental performance needs and supply chain constraints while reducing costs and carbon footprint. Nano One has received funding from various government programs and the current "Scaling of Advanced Battery Materials Project" is supported by Sustainable Development Technology Canada (SDTC) and the Innovative Clean Energy (ICE) Fund of the Province of British Columbia. Certain information contained herein may constitute "forward-looking information" and "forward-looking statements" within the meaning of applicable securities legislation. All statements, other than statements of historical fact, are forward-looking statements. Forward-looking information in this news release includes, but is not limited to, statements with respect to: the results of the joint development and the status of the partnership with Saint-Gobain, and any future collaboration projects that may be put into place, the execution of the Company's plans which are contingent on such support and awards and the commercialization of the Company's technology and patents. Generally, forward-looking information can be

identified by the use of terminology such as 'believe', 'expect', 'anticipate', 'plan', 'intend', 'continue', 'estimate', 'may', 'will', 'should', 'ongoing', 'target', 'goal', 'potential' or variations of such words and phrases or statements that certain actions, events or results "will" occur. Forward-looking statements are based on the current opinions and estimates of management as of the date such statements are made are not, and cannot be, a guarantee of future results or events. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking statements or forward-looking information, including but not limited to: any future collaborations that may happen with Saint-Gobain, the Company's ability to achieve its stated goals, the commercialization of the Company's technology and patents and other risk factors as identified in Nano One's MD&A and its Annual Information Form dated March 15, 2021, both for the year ended December 31, 2020, and in recent securities filings for the Companies which are available at www.sedar.com. Although management of the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements and forward-looking information. The Company does not undertake any obligation to update any forward-looking statements or forward-looking information that is incorporated by reference herein, except as required by applicable securities laws. Investors
