

NanoSphere Forms Strategic Partnership to Launch Evolve Products in Mexico

written by Raj Shah | December 10, 2018

❌ December 10, 2018 ([Source](#)) – *Agreement will bring the patented NanoSphere Delivery System™ to an emerging \$5 billion cannabis market*

NanoSphere Health Sciences Inc. (CSE:NSHS) (OTC:NSHSF) (“NanoSphere” or “the Company”), the biotechnology leader behind the patented NanoSphere Delivery System™, is pleased to announce the Company has signed a Letter of Intent forming a partnership with Abba Import Export S.A. de C.V., to launch Evolve’s growing product line in Mexico.

The partnership was developed through NanoSphere’s Canadian-based cannabis division, NanoSphere Cannabis International Inc. (NCI). President Gary Symons says the agreement is part of NCI’s strategy to find global partners in countries where medical or recreational cannabis is being legalized. Mexico’s designated Interior Minister Olga Sanchez announced on Nov. 8 that Mexico would become the third country in the world – after Uruguay and Canada – to legalize both medical and recreational cannabis.

“We have been looking at the market in Mexico for some time, and we’ve been very fortunate to find a strong partner in Abba, with existing sales channels through the three largest pharmacy chains in the country, and their own GMP certified production facility for health supplements,” Symons explained.

This agreement marks the second licensing deal for NCI since the company was formed on Nov. 1st, 2018. The first was an agreement

ceding the Master License for NanoSphere delivery technology to Delta 9 Cannabis Inc., which is currently building out its cannabis extract production facilities.

“In my opinion, NanoSphere has developed the most advanced delivery system for cannabis in the world, and this proprietary technology is allowing us to expand very quickly,” said Symons.

Julio Antonio D Miguel, President and CEO of Abba, says the upcoming partnership with NCI and Delta 9 will allow his company to take a leading role in the fast approaching cannabis market.

“As a leading distributor of health supplements in Mexico, we can see the tremendous potential for the cannabis industry,” said Ibarra. “Our goal was to secure the relationship with NanoSphere so that our company would have the exclusive right to distribute a truly revolutionary product for our customers.”

The Letter of Intent provides Abba with the exclusive Master License for NanoSphere’s cannabis and CBD products throughout Mexico, pending the signing of a definitive licensing agreement.

Under the agreement, NanoSphere will initially export its cannabis product line, Evolve Formulas to Abba from Canadian partner and Licensed Producer Delta 9 Cannabis Inc. The companies also plan to collaborate on a production facility in Mexico for dried cannabis, extracts, and NanoSphere’s various cannabis products.

NanoSphere Health’s Evolve Formula’s line, currently consists of three variations of the transdermal NanoSerum™ formula, one THC-dominant, CBD-dominant and hemp-derived CBD. All applications utilize the NanoSphere Delivery System™, for increased bioavailability, minimal wait-time and precision-metered dosing. This patented technology is the first and only advanced cannabinoid delivery system and can only be found in NanoSphere

Health products.

To secure the Definitive Licensing Agreement, Abba has agreed to pay to NanoSphere a licensing fee of \$400,000 USD, with those funds to be used by NCI to help complete the buildout of Abba's production facility and distribution network. The two companies will share equally in the gross profits resulting from the sale of NanoSphere products in Mexico.

NanoSphere's Commitment to Licensing IP

NanoSphere launched its IP licensing program in 2015 and is entertaining several licensing opportunities via a rigorous evaluation process. For more information about NanoSphere's licensing program, please visit: <https://www.nanospherehealth.com/licensing/>

About NanoSphere Health Sciences LLC and NCI

NanoSphere is a biotechnology firm that developed a patented platform using nanotechnology in the biodelivery of supplements, nutraceuticals and over-the-counter medications for the cannabis, pharmaceutical and animal health industries, and beyond. NanoSphere trades on the CSE under the stock symbol NSHS. NCI is the cannabis division of NanoSphere. For more information on NanoSphere, please visit <http://www.nanospherehealth.com>.

About ABBA IMPORT EXPORT SA DE CV

Abba and its fabrication subsidiary Viride Laboratorios were founded in 1996 to supply high quality health products to consumers across Mexico. Abba imports only the finest quality products produced under GMP standards, and distributes through the country's largest retail networks, including among others Walmart, Costco, GNC, and the largest pharmacy and grocery

chains in Mexico.
