

NanoSphere Health Sciences' Brand Evolve Formulas Expanding Rapidly Across Colorado and Beyond

written by Raj Shah | July 11, 2018

July 11, 2018 ([Source](#)) – *Next-Generation Cannabis Products Now Available in Over 200 Colorado Dispensaries, with Production Beginning in the California Market*

[NanoSphere Health Sciences, INC](#) (CSE: NSHS) (OTC: NSHSF), the biotech firm behind the groundbreaking NanoSphere Delivery System™, is experiencing a period of rapid growth for its cannabis brand, Evolve Formulas. The company has not only successfully expanded the product line to over 200 dispensaries in the Colorado market, but has also officially begun training and preparation for production in the California market.

Propelling this accelerated growth is Evolve Formulas' pioneering product, Transdermal NanoSerum™; a viscous gel which is applied to the skin for rapid and effective relief from pain, inflammation and anxiety. The rate of growth has been shown to be roughly 30% month over month in demand for NanoSerum™, allowing NanoSphere Health Sciences to discuss significant sales revenues for the first time since becoming publicly listed in December 2017.

Evolve Formulas products utilize the patented NanoSphere Delivery System™ to nanoencapsulate cannabinoids in lipid membranes for transportation through the skin and mucosa into the cells and bloodstream. This technology eliminates delayed onset of action, vastly increases bioavailability of the

ingredients and alleviates adverse side effects of cannabis.

The NanoSphere Health Sciences business model is centered on licensing IP to allow the expansion of Evolve Formulas into new legal markets. Having recently announced a licensing partnership with Vertical™, the largest fully integrated company in the U.S. cannabis market, for multiple states, NanoSphere Health Sciences has now initiated partner training in California for the production of its products and unique technology and has started transporting essential equipment to new manufacturing sites.

“We are now in roughly one of every four stores in Colorado—an impressive rate of penetration into a highly competitive market. This, coupled with countless powerful testimonials we have received from Evolve Formulas customers—who rely on our products to relieve everything from chronic pain to PTSD—demonstrates our company’s superior offerings. We are also excited to be officially in the first stage of our California journey by commencing production in this new market, so that we can bring the benefits of cannabis to even more consumers in a safer, more effective way,” said David Sutton, COO and President of NanoSphere Health Sciences and Evolve Formulas.
