

# Nord Announces Revocation of MCTO

written by Raj Shah | July 22, 2025

July 22, 2025 ([Source](#)) – Nord Precious Metals Mining Inc., (TSXV: NTH) (OTCQB: CCWOF) (Frankfurt: 4T9B) (the “Company” or “Nord”) is pleased to announce that effective July 22, 2025, the British Columbia Securities Commission (‘BCSC’) has revoked the management cease trade order (the “MCTO”) it had previously granted to the Company on May 1, 2025 under National Policy 12-203 – Management Cease Trade Orders, as the Company successfully completed the filing of its (i) annual audited financial statements, management’s discussion and analysis, and related certifications for the year ended December 31, 2024 on July 14, 2025, and (ii) unaudited interim financial statements, management’s discussion and analysis, and related certifications for the three months ended March 31, 2025 on July 21, 2025 (collectively, the “Annual and Interim Filings”).

The revocation of the MCTO means members of management are no longer prevented from trading the Company’s securities. All of the Annual and Interim Filings are available under the Company’s profile on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

## About Nord Precious Metals Mining Inc.

Nord Precious Metals Mining Inc. operates the only permitted high-grade milling facility in the historic Cobalt Camp of Ontario, where the Company has established a unique position integrating high-grade silver discovery with strategic metals recovery operations. The Company’s flagship Castle property encompasses 63 sq. km of exploration ground and the past-producing Castle Mine, complemented by the Castle East discovery where drilling has delineated 7.56 million ounces of silver in

Inferred resources grading an average of 8,582 g/t Ag (250.2 oz/ton).

Nord's integrated processing strategy leverages the synergistic value of multiple metals. High-grade silver recovery supports the economics of extracting critical minerals including cobalt, nickel, and other battery metals, while the company's proprietary Re-20x hydrometallurgical process enables production of technical-grade cobalt sulphate and nickel-manganese-cobalt (NMC) formulations. This multi-metal approach, combined with established infrastructure including TTL Laboratories and underground mine access, positions Nord to capitalize on both precious metals markets and the growing demand for battery materials.

The Company maintains a strategic portfolio of battery metals properties in Northern Quebec including its 35% ownership in Coniagas Battery Metals Inc. (TSXV: COS) as well as the St. Denis-Sangster lithium project comprising 260 square kilometers of prospective ground near Cochrane, Ontario.
