

Nord Precious Metals AGM Results

written by Raj Shah | July 15, 2025

July 15, 2025 ([Source](#)) – Nord Precious Metals Mining Inc., (TSXV: NTH) (OTCQB: CCWOF) (Frankfurt: 4T9B) (the “Company” or “Nord”), announces that the Annual General Meeting was held today, Tuesday, July 15, 2025 and is pleased to report that all resolutions proposed to the Shareholders were approved with 99.24% or more voting in favour in all categories. The resolutions approved are as follows:

1. The following individuals were re-elected Directors of the Company: Frank J. Basa, Matthew Halliday and Daniel Barrette.
2. SHIM & Associates LLP, Chartered Professional Accountants, were appointed as Company auditors.
3. Adoption of the Company’s 10% rolling share option plan was ratified and approved.

The Board of Directors appointed the following officers of the Company for the ensuing year:

Frank J. Basa:	President & Chief Executive Officer
Robert Suttie:	Chief Financial Officer
Tina Whyte:	Corporate Secretary

Frank J. Basa, Matthew Halliday and Daniel Barrette were re-appointed as members of the Audit Committee for the upcoming year.

About Nord Precious Metals Mining Inc.

Nord Precious Metals Mining Inc. (formerly Canada Silver Cobalt Works Inc.) recently discovered a major high-grade silver vein system at Castle East located 1.5 km from its 100%-owned, past-producing Castle Mine near Gowganda in the prolific and world-class silver-cobalt mining district of Northern Ontario. The Company has completed a 60,000 m drill program aimed at expanding the size of the deposit with an update to the resource estimate underway.

In May 2020, based on a small initial drill program, the Company published the region's first 43-101 resource estimate that contained a total of 7.56 million ounces of silver in Inferred resources, comprising very high-grade silver (8,582 grams per tonne un-cut or 250.2 oz/ton) in 27,400 tonnes of material from two sections (1A and 1B) of the Castle East Robinson Zone, beginning at a vertical depth of approximately 400 meters. Note that mineral resources that are not mineral reserves and do not have demonstrated economic viability. Please refer to the Nord (previously Canada Silver Cobalt Works) Press Release May 28, 2020, for the resource estimate. Report reference: Rachidi, M. 2020, NI 43-101 Technical Report Mineral Resource Estimate for Castle East, Robinson Zone, Ontario, Canada, with an effective date of May 28, 2020, and a signature date of July 13, 2020.

The Company also has: (1) 14 battery metals properties in Northern Quebec where it has recently completed a nearly 16,000-metre drill program on the Graal property, which has since been spun out into Coniagas Battery Metals Inc. Nord owns 39% of the Coniagas shares; and (2) St. Denis-Sangster lithium project – 260 square kilometers of greenfield exploration ground with numerous pegmatites focussed along a significant volcanic sedimentary rock – Archean granite contact near Cochrane, Ontario contiguous to Power Metals' Case Lake Lithium properties.

Nord's silver-cobalt Castle mine and 78 sq. km Castle property feature strong exploration upside for silver, cobalt, nickel, gold, and copper. With underground access at the fully owned Castle Mine, an exceptional high-grade silver discovery at Castle East, a pilot plant to produce cobalt-rich gravity concentrates, a processing facility (TTL Laboratories) in the town of Cobalt, and a proprietary hydrometallurgical process known as Re-20x (for the creation of technical-grade cobalt sulphate as well as nickel-manganese-cobalt (NMC) formulations), Nord is strategically positioned to become a Canadian leader in the silver-cobalt space.
