

Ontario Minister and Nipissing First Nation Chief Visit Volta's Springer Rare Earth Project, Advancing Indigenous Partnership and Critical Minerals Development

written by Raj Shah | December 18, 2025

December 18, 2025 ([Source](#)) – Volta Metals Ltd. (CSE: VLTA) (FSE: DOW) (OTC Pink: VOLMF) (“Volta” or the “Company”) is pleased to report a significant site visit by the Honourable Greg Rickford, Minister of Indigenous Affairs and First Nations Economic Reconciliation of Ontario, and Nipissing First Nation (“NFN”) Chief Cathy Stevens to the Company’s Springer Rare Earth Project near Sturgeon Falls, Ontario.

STRATEGIC ALIGNMENT ON PROJECT DEVELOPMENT

The visit focussed on three key areas that directly impact the Project's development timeline: permitting pathways under Ontario's streamlined regulatory framework, Indigenous economic participation opportunities, and the Project's positioning within North America's critical minerals supply chain.

Minister Rickford examined the Project's geology and infrastructure advantages, including its proximity to established transportation corridors and power infrastructure. Discussions centred on how Ontario's "One Project, One Process" initiative could accelerate permitting while maintaining environmental standards and respecting Indigenous rights and local interests.

NFN brings an extensive network of First Nation-owned and community-partnered businesses that can support project advancement as technical work and permitting progress. These

relationships offer Volta access to a skilled workforce, logistics expertise, and essential local services throughout the development stages of the Project.

ECONOMIC RECONCILIATION FRAMEWORK

Minister Rickford was briefed on the Project's strategic location, its suite of critical minerals and the ongoing community engagement. This site visit represents practical progress in economic reconciliation, moving beyond consultation to examine specific pathways for NFN participation in project economics.

For Volta, the ministerial engagement underscores provincial recognition of Springer's strategic potential within Canada's domestic rare earth supply chain. With rare earth elements largely sourced from outside North America, these supply-chain vulnerabilities remain a critical issue that governments and end-users are actively working to mitigate.

President and CEO, Kerem Usenmez commented, "The Minister's engagement, together with our ongoing collaboration with Nipissing First Nation, underscores the strategic importance of advancing a domestic rare earth and gallium project in Ontario. With strong Indigenous partnerships, established infrastructure, and favourable geology, Springer is well-positioned as we de-risk the Project through exploration and permitting. We appreciate the support and regulatory clarity provided through Ontario's One Project, One Process framework and look forward to continued collaboration as the project advances."

Nipissing First Nation Chief Cathy Stevens commented, "This Project presents a significant opportunity for Nipissing First Nation, and it is essential that our perspectives guide every stage of its development. We appreciate the commitment to open dialogue and collaboration, and we will continue to advance

opportunities that create economic growth for our members while protecting the lands and waters that sustain us.”

Minister Greg Rockford commented, *“Thankful for the opportunity to join Chief Stevens in visiting Volta’s Springer Rare Earth Project, which is quite the find. The ongoing partnership with Nipissing First Nation demonstrates economic reconciliation in action, ensuring resources are developed responsibly while delivering meaningful economic opportunities for First Nations.”*

ABOUT NIPISSING FIRST NATION

Nipissing First Nation is classified as an urban reserve and is located on the north shore of Lake Nipissing, approximately 320 kilometres north of Toronto. NFN's land base spans over 30 kilometres between the City of North Bay to the east and the Municipality of West Nipissing to the west. NFN has 11 communities distributed across the Nipissing land base: Garden Village, Veteran's Lane, Mosquito Creek, Jocko Point, Paradise Point, Meadowside, Beaucage Subdivision, Beaucage Village, Serenity Lane, Yellek, and Duchesnay. The people of NFN, known as the Nibisiing Nishinaabeg, are of Ojibway and Algonquin descent and have lived in the area of Lake Nipissing since time immemorial.

Neither the CSE nor the Canadian Investment Regulatory Organization (CIR0) accepts responsibility for the adequacy or accuracy of this release.

This news release contains forward-looking statements relating to product development, plans, strategies, and other statements that are not historical facts. Forward-looking statements are often identified by terms such as “will”, “may”, “should”, “anticipate”, “expects” and similar expressions. All statements other than statements of historical fact included in this news release are forward-looking statements that involve risks and uncertainties. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from the Company’s expectations include: the risks detailed from time to time in the filings made by the Company with securities regulators; the fact that Volta’s interests in its mineral properties are options only and there are no guarantee that such interest, if earned, will be certain; the future prices and demand for lithium; rare earth elements and gallium; and delays or the inability of the Company to obtain any necessary approvals, permits and authorizations required to carry out its business plans. The reader is cautioned that assumptions used in the preparation of any forward-looking statements may prove to be incorrect. Events or circumstances may cause actual results to differ materially from those predicted, as a result of numerous known and unknown risks, uncertainties, and other factors, many of which are beyond the control of the Company. The reader is cautioned not to place undue reliance on any forward-looking statements. Such information, although considered reasonable by management at the

time of preparation, may prove to be incorrect and actual results may differ materially from those anticipated. Forward-looking statements contained in this news release are expressly qualified by this cautionary statement. The forward-looking statements contained in this news release are made as of the date of this news release, and the Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, other than as required by law.
