Power Metallic Mines CEO Terry Lynch to Deliver Keynote Address on “Tariffs and the Strategic Future of North American Critical Minerals” at CMI Summit IV

written by Raj Shah | April 15, 2025

TORONTO, ONTARIO – April 15, 2025 – The Critical Minerals Institute (CMI) is pleased to announce that Terry Lynch, Chief Executive Officer of Power Metallic Mines Inc. (TSXV: PNPN | OTCQB: PNPNF), will deliver a keynote address at the prestigious CMI Summit IV, set for May 13–14, 2025, at the National Club in Toronto, Ontario. Mr. Lynch will explore the pivotal topic: “Tariffs and the Strategic Future of North American Critical Minerals.”

Terry Lynch, a recognized industry leader, will delve deeply into the complex dynamics of tariffs, their broader economic implications, and their strategic relevance to North American energy independence and security. With tariffs increasingly employed as instruments of economic and national security policy, Lynch’s insights promise to illuminate both challenges and opportunities inherent in their application.

In advance of his keynote, Terry Lynch offered the following impactful perspective:

“Tariffs are about America prioritizing the security and prosperity of Americans—ensuring that they not only live well

but also sleep safely at night. In a geopolitical landscape marked by uncertainty and strategic competition, tariffs become powerful tools, reshaping interest rates and driving commodities markets toward historic corrections. The essential truth is this: secure, reliable, North American sources for critical minerals aren't merely economic choices—they're national imperatives. We're at the cusp of significant strategic shifts, and recognizing this will position policymakers and industry leaders alike to make decisions that shape our collective economic future."

The theme for this year's CMI Summit IV—"The War for Critical Minerals and Capital Resources"—reflects the intensifying global competition and geopolitical complexities surrounding these strategic commodities. Lynch's keynote will join insights from over two dozen industry leaders, collectively shaping this critical conversation.

"Terry Lynch's address will provide essential clarity for policymakers, industry leaders, and academics alike," stated Tracy Hughes, Founder and Executive Director of CMI. "His thought leadership on tariffs and market dynamics comes at a pivotal moment, illuminating the interconnected economic and security landscapes we face. Notably, Power Metallic's Nisk project is particularly relevant, as it encompasses three critical minerals identified on the recently released CMI Critical Minerals List 2025—nickel, copper, and PGMs—highlighting the strategic importance of their efforts."

The two-day summit agenda features influential keynote speeches, interactive panels, and strategic workshops aimed at forging actionable solutions and strategic partnerships essential for securing the global critical minerals supply chain.

About Power Metallic Mines Inc.

Power Metallic Mines Inc. (TSXV: PNPN | OTCQB: PNPNF) is a Canadian exploration company dedicated to developing the high-grade Nickel-Copper-PGM, Gold, and Silver Nisk project into Canada's next major polymetallic mine. Located in a region known for its mineral wealth, the Nisk project encompasses a significant land package featuring extensive high-grade mineralization. Power Metallic Mines is committed to advancing exploration through targeted drill programs and innovative mining technologies, ensuring a sustainable and economically viable future.

About the Critical Minerals Institute (CMI):

The Critical Minerals Institute (CMI) is a trusted global leader in connecting companies, capital markets, and experts in the critical minerals industry. By combining in-depth research, thought leadership, and extensive industry expertise, CMI provides exclusive insights, invaluable resources, and robust networking opportunities that empower its members to thrive in a rapidly evolving global marketplace. Through collaboration with businesses, governments, and other stakeholders, CMI addresses both the challenges and opportunities within the critical minerals sector, highlighting the value, sustainability, and strategic importance of these essential materials. As a result, CMI ensures its members are equipped to drive innovation, lead

in cutting-edge technology, and fuel industrial advancement worldwide.

Our **CMI** offerings include exclusive Masterclasses and the weekly Technology Metals Report (TMR), which provide pivotal industry insights. The theme for our 2025 summit, “The War for Critical Minerals and Capital Resources,” focuses on uniting industry leaders to address the pressing issues facing the global critical minerals market. This premier event, CMI Summit IV, is set to take place on May 13-14, 2025, at the National Club in Toronto, Ontario, Canada. The CMI Summit aims to foster strategic partnerships and develop actionable solutions that support the growing demand for critical minerals, crucial for the advancement of clean energy, technology, and national security.
