

# Predictiv AI signs additional purchase orders for its ThermalPass fever detection system

written by Raj Shah | December 23, 2020

Toronto, Canada, December 23, 2020 – **Predictiv AI Inc.** (TSXV: **PAI** | OTC: **INOTF** | FSE: **71TA**) (“**Predictiv AI**” or the “**Company**”), a software and solutions provider in the artificial intelligence markets, is pleased to update on recent sales of ThermalPass, its sensor-based temperature screening system.

Since our last update on December 11<sup>th</sup>, the Company has received orders for an additional thirty-four (34) units, bringing the total sold to sixty-two (62), since ThermalPass’ commercial launch only seven weeks ago. The customers for the current 34 units include initial orders from prisons and aboriginal communities in Canada and new orders from hospitals and public schools in the US.

Predictiv AI’s management and channel partners have been working to expand the sales pipeline for ThermalPass to numerous markets including retail, financial institutions, professional sports teams, leagues and organizations, cruise lines and a wide spectrum of corporations and manufacturers.

“We are incredibly pleased with the early-stage orders from companies across a number of different industries that have been gravitating to ThermalPass, preferring our distinctive solution over the competition,” said Michael Lende, President and CEO of Predictiv AI. “We view a significant proportion of these sales as “foundational” orders from substantial ecosystem companies;

as such, we see strong potential to receive large batch orders from these same customers in Q1 2021 and beyond.”

Predictiv AI is not making any express or implied claims that its product has the ability to eliminate, cure, or contain the COVID-19 (or SARS-2 coronavirus) at this time.
