

Predictmedix Inc. Announces Grant of Options

written by Raj Shah | April 10, 2020

April 9, 2020 ([Source](#)) – Predictmedix Inc. (CSE:PMED) (CNSX:PMED.CN) (OTC:PMEDF) (formerly Cultivar Holdings Inc.) (the “Company”) wishes to announce that pursuant to its stock option plan, it has granted stock options to its directors, officers and consultants on April 6, 2020 to purchase up to 9,850,000 common shares of the Company at an exercise price of \$0.15 per common share. The options have a term of one (1) year expiring on April 6, 2021. These options have varying vesting periods, with the majority being in equal installments over a quarterly basis throughout the term.

About Predictmedix Inc.

Predictmedix Inc. is an artificial intelligence (“AI”) company developing disruptive and cutting-edge tools for impairment testing and healthcare. It is intended that the Company’s cannabis and alcohol impairment detection tools will be used across various workplaces and by law enforcement agents. Its technology uses facial and voice recognition to identify both cannabis and alcohol impairment by utilizing multiple features along with numerous different data points. Testing does not require any body fluids or human intervention, thereby helping to remove human error and the potential for discrimination and prejudice. The Company has partnered with Tech Mahindra and Hindalco to help expedite the launch of its impairment technology, as well as the prestigious Indian Institute of Technology.

The Company is also developing cutting edge screening for the healthcare industry. The recent advent of COVID-19 pandemic has

placed unprecedented stress on the global economy and highlights the need for tools to help screen mass populations for infectious diseases, with the hope of preventing pandemics in the future. In turn, Predictmedix Inc. is expanding its proprietary AI technology to screen for infectious diseases such as influenza and coronaviruses (COVID-19). Additionally, psychiatric disorders such as depression, dementia and Alzheimer's disease can carry a significant burden and early identification is the key to better management. To help address this, the Company is also expanding its proprietary AI technology to screen for psychiatric and/or brain disorders such as depression, dementia and Alzheimer's disease.
