

Predictmedix Inc. Announces Launch of a Pilot with Hindalco Industries Ltd for Its Impairment Detection AI Technology

written by Raj Shah | April 22, 2020

April 22, 2020 ([Source](#)) – **Predictmedix Inc. one step closer to the Commercialization of Impairment Technology**

Predictmedix Inc. (CSE:PMED) (CNSX:PMED.CN) (OTC:PMEDF) (“Predictmedix” or the “Company”) is pleased to announce that the company is launching a pilot of its cannabis and alcohol impairment detection technology with Hindalco Industries Ltd (NSE: HINDALCO) (“Hindalco”).

Hindalco, like many companies, recognize the impact of cannabis and alcohol impairment on their workforce. A National Institute on Drug Abuse Study found that employees who tested positive for cannabis had 55% more industrial accidents, 85% more injuries and 75% greater absenteeism. The dwiresourcecenter.org notes that employees using alcohol or drugs at work cost employers on average \$7,000 per year.

The Predictmedix pilot will be carried out at Hindalco’s manufacturing unit, Aditya Aluminum which is a 900 Megawatt captive power plant. The pilot is expected to begin within the next two weeks and will utilize Predictmedix’s proprietary AI powered impairment detection technology (patent pending) to identify cannabis and alcohol impairment. The pilot if uninterrupted, is expected to be completed within a 12-week

period.

Mr. Kailash Pandey, Unit Head of Hindalco commented, "Industry 4.0 has immense potential and AI is its fundamental driver. We are excited to work with the frontier technology for better safety and compliance at our plants."

Predictmedix has been carrying out an independent impairment study for cannabis and alcohol with over 3,000 participants using its proprietary AI technology. With the positive outcomes achieved to date, the company has been able to advance to the pilot stage with Hindalco.

"The beginning of this pilot with Hindalco is a significant milestone for our impairment detection technology as it brings us a step closer toward commercialization and the full market launch of our technology for the workplace", said Dr. Rahul Kushwah, COO of Predictmedix.

About Hindalco Industries Ltd

Hindalco is the metals flagship company of the Aditya Birla Group (an industrial conglomerate with annual revenues exceeding \$40 billion USD). Hindalco had consolidated revenues of US\$18.7 billion and recently completed \$2.8 billion acquisition of Aleris by its wholly-owned US subsidiary Novelis Inc. Hindalco is the world's largest aluminium rolling company and one of Asia's biggest producers of primary aluminium with over 36,000 employees in several countries. In India, the company's aluminium units across the country encompass the gamut of operations from bauxite mining, alumina refining, coal mining, captive power plants and aluminium smelting to downstream rolling, extrusions and foils. Today, Hindalco ranks among the global aluminium majors as an integrated producer and a footprint in 10 countries outside India. To find out more visit www.hindalco.com

About Predictmedix Inc.

Predictmedix Inc. is an artificial intelligence (“AI”) company developing disruptive tools for impairment testing and healthcare. It is intended that the Company’s cannabis and alcohol impairment detection tools will be used across various workplaces and by law enforcement agents. Its technology uses facial and voice recognition to identify both cannabis and alcohol impairment by utilizing multiple features along with numerous different data points. Testing does not require any body fluids or human intervention, thereby helping to remove human error and the potential for discrimination and prejudice. The Company has partnered with Tech Mahindra and Hindalco to help expedite the launch of its impairment technology, as well as the prestigious Indian Institute of Technology.

The Company is also developing AI based screening for the healthcare industry. The recent advent of COVID-19 pandemic has placed unprecedented stress on the global economy and highlights the need for tools to help screen mass populations for infectious diseases, with the hope of preventing pandemics in the future. In turn, Predictmedix Inc. is expanding its proprietary AI technology to screen for infectious diseases such as influenza and coronaviruses (COVID-19). Our current partners along with advisory board members have played a key role in gathering data pertaining to COVID-19, which has allowed us to develop a predictive mass screening tool for COVID-19. The technology is for mass screening and is to be used to predict and identify individuals who have the highest likelihood of being infected with COVID-19.

Additionally, psychiatric disorders such as depression, dementia and Alzheimer’s disease can carry a significant burden and early identification is the key to better management. To help address this, the Company is also expanding its proprietary AI

technology to screen for psychiatric and/or brain disorders such as depression, dementia and Alzheimer's disease. To find out more visit us at www.predictmedix.com

Disclaimer: "The Company is not making any express or implied claims that its mass screening product has the ability to eliminate, cure or contain the Covid-19 (or SARS-2 Coronavirus) at this time".
