

Project 81 Exploration Update: JV Partner Announces Results and a Drilling Program on Carnegie Twp

written by Raj Shah | August 23, 2019

TSXV: NOB

August 23, 2019 ([Source](#)) – Noble Mineral Exploration Inc. (“Noble” or the “Company”) (TSXV:NOB) (FRANKFURT:NB7)(OTC:NLPXF) is pleased to announce that it has been advised by its Option and JV partner on Carnegie Township the results of the

2019 winter drill program.

At Carnegie a total of seven holes were drilled to test conductive trends from a previous airborne EM & Magnetic survey flown in 2018. Four holes encountered anomalous zinc and copper mineralization with one hole (CG19-01) intersecting 12.0 m of Zn mineralization with some sections greater than 1% zinc that require re-assay. One drill-hole encountered up to 18 m of massive to semi-massive sulphide containing anomalous but low-grade zinc.

Airborne EM and Magnetic surveys have been completed on the northern part of Carnegie Twp. in early 2019. Two more holes are scheduled to be drilled at Carnegie to test additional airborne targets, starting in September, 2019.

A follow-up drill program is planned to continue exploration in the area around CG19-01.

Vance White, President and CEO of Noble is quoted as saying “we are very pleased that our Carnegie partners will continue with additional work on the Carnegie targets. Noble will continue its business model of “Project Generator” by seeking additional Option and JV Partners to our extensive 79,000 ha land holdings”.

Randy S C Singh PGeo (ON), PEng (ON), VP Exploration & Project Development of Noble and a “qualified person” as such term is defined by National Instrument 43-101, has verified the data disclosed in this news release, and has otherwise reviewed and approved the technical information in this news release on behalf of Noble Mineral Exploration Inc.
