

Romios Agrees to Sell 80% Interest in its Thunder Bay Silver Project to Honey Badger Silver Inc.

written by Raj Shah | April 28, 2021

April 27, 2021 ([Source](#)) – **Romios Gold Resources Inc. (TSXV: RG) (OTC Pink: RMIOF) (FSE: D4R)** (“**Romios**” or the “**Company**”) is pleased to announce that it has signed a Letter of Intent (the “LOI”) with Honey Badger Silver Inc. (Honey Badger) to sell an 80% interest in Romios’ five claim blocks in the Thunder Bay silver district of northwestern Ontario to Honey Badger. Romios acquired these five claim blocks by online staking over the past year and they cover 5 historic silver prospects: the former Victoria, Federal and Lily of the Valley silver mines, and the Cariboo and Cloud Bay prospects. The 5 blocks consist of 87 cell claims covering 1869.5 hectares or 4619.7 acres.

The three past producing properties have been largely unexplored by modern methods, in some cases they have sat untouched since the 1800’s. Although the historic commercial production by the small time operators in the 1800s may have been relatively small at these sites, the grades were often appreciable, and there is no record of any modern exploration efforts being used to trace these veins along strike. Honey Badger owns some of the larger former producers on the mainland in the Thunder Bay camp, including the Beaver Mine, and has large holdings immediately adjacent to the former Silver Mountain deposits(s).

Romios’ management believes that the sale of a majority interest in the Company’s silver prospects to Honey Badger significantly increases the commercial potential of these prospects. Honey

Badger's numerous silver assets in the district provide a greater opportunity to eventually sustain a central mill that could process ore from the numerous prospects concentrated in the area. By retaining a 20% interest in its claims, Romios maintains exposure to the potential production from these prospects.

The terms of the LOI form the basis for a definitive agreement between Romios and Honey Badger expected to be signed by July 30, 2021. In consideration for an 80% interest in the 5 claim blocks, Honey Badger agrees to: a) issue shares of Honey Badger to Romios for a value of \$150,000 at a price equal to the volume weighted average price of its common shares, trading on the TSXV for the thirty trading days immediately preceding the date of the transaction's announcement, and b) free-carry all costs and expenses related to the maintenance and advancement of the Project to pre-feasibility. Romios shall grant a right of first refusal to Honey Badger on its 20% remaining interest, post-transaction. If any party is diluted to a 10% or less interest in the joint venture, such party's interest shall be converted to a 2% net smelter return royalty (2% NSR).

The technical information in this news release has been reviewed and approved by John Biczok, P. Geo., VP-Exploration for Romios and a Qualified Person as defined by National Instrument 43-101. In addition to his extensive experience exploring for a wide variety of ore deposit types across Canada and India, Mr. Biczok spent 12 years conducting exploration and research at the Musselwhite gold mine in NW Ontario.

About Romios Gold Resources Inc.

Romios Gold Resources Inc., a progressive Canadian mineral exploration company established in 1995, is engaged in precious and base metal exploration primarily focused on gold, silver and

copper. It has extensive claim holdings covering porphyry copper-gold prospects in the "Golden Triangle" of British Columbia as well as a 100% interest in the Lundmark-Akow Lake gold-copper property in NW Ontario, the La Corne molybdenum property in Quebec and the Scossa gold property in Nevada. The Company also retains a 2% NSR on the Hislop gold property in Ontario. For more information, visit Romios' website www.romios.com .
