

Siyata Mobile and AINA Wireless Announce Strategic Partnership

written by Raj Shah | October 9, 2018

✘ October 9, 2018 ([Source](#)) – *AINA Wireless Voice Responder and Smart Button to be featured alongside Uniden® UV350, Siyata's Smart In-Vehicle Device*

Siyata Mobile Inc. (the “Company” or “Siyata”) (TSX-V:SIM / OTCQX:SYATF) is pleased to announce a partnership with AINA Wireless (“AINA”) whereby AINA’s wireless PTT Voice Responder and Smart Button will be featured with Uniden® UV350 4G/LTE in-vehicle device.

AINA’s PTT Voice Responder and Smart Button is a next generation speaker-microphone and Bluetooth Remote Control which can be connected via Bluetooth to the Uniden UV350. The device is designed to work with different walkie talkie style Push-to-Talk applications, featuring several buttons that allow safe and simple communication to all required parties. Users can remotely control functions such as, Push-to-Talk, phone calls, channel switching and emergency alerts, and stay connected with their colleagues even when working around the truck. To be fully compliant with DOT distracted driving regulations, the Voice Responder’s charging cradle can be attached directly to the Uniden UV350 for recharging purposes.

Maximillian LeRoux, CEO of AINA Wireless stated, “AINA Wireless’ PTT accessories are the perfect combination of technology and convenience to further enhance the highly innovative Push-to-Talk Over Cellular in-vehicle solution in the Uniden UV350. Our products will help fleet workforces be more efficient and safer

in their communication, through seamless integration with the Uniden UV350's Android operating system."

Marc Seelenfreund, CEO and Chairman of Siyata Mobile added, "One of our core focuses with launching the Uniden UV350 is safety. Partnering with AINA and providing customers with wireless accessories will allow us to further help commercial and fleet drivers keep their eyes on the road, and hands on the wheel. AINA is a well-established and recognized brand in our target market and we are pleased to be bringing our expanded product offerings to fleets and first responders in North America."

The Uniden® UV350 4G/LTE is the world's first and only in-vehicle connected cellular device with Push-to-Talk over Cellular ("PoC") that is compatible on "Band 14." The Uniden® UV350 is an all-in-one, purpose-built in-vehicle Internet of Things ("IoT") device to upgrade antiquated two-way radio technology as a smarter, more advanced solution to communicate, navigate and create in-vehicle efficiencies never seen before in the commercial fleet and vehicle market. Android-based applications and other features available for download on the Uniden® UV350 help improve driver/worker safety and create efficiencies not offered by single-purpose hardware which clutter the inside of a vehicle cabin which can be distracting for drivers.

About Siyata

A TSX Venture Top 50 Company, Siyata Mobile Inc. is a leading global developer and provider of cellular communications systems for enterprise customers, specializing in connected vehicle products for professional fleets, marketed under the Uniden® Cellular brand. Since developing the world's first 3G connected vehicle device, Siyata has been a pioneer in the industry, launching the world's first 4G LTE all-in-one fleet

communications device in 2017. Incorporating voice, push-to-talk over cellular, data, and fleet management solutions into a single device, the company aims to become the connected vehicle communications device of choice for commercial vehicles and fleets around the world.

Siyata also offers rugged phones for industrial users and signal boosters for homes, buildings, and fleets with poor cell coverage. Siyata's customers include cellular operators, commercial vehicle technology distributors, and fleets of all sizes in Canada, the U.S., Europe, Australia, and the Middle East.
