

Smartcool Generates Efficiency Gains For University Group

written by Raj Shah | November 19, 2019

November 19, 2019 ([Source](#)) – *Helps Meet its Goals of Reducing its Carbon Footprint*

Smartcool Systems Inc. (TSX.V: SSC) (OTC Pink: SSCF) (FSE: R3W) (“Smartcool” or the “Company”) is pleased to announce that it has received a first Purchase Order and completed the installation for 3 ESM (Energy Savings Module) systems at a London, England based University. The ESMs were installed on three large chiller sets.

Savings are estimated to be in the range of £40,000 (\$60,000 CAD) annually.

The facilities are part of 49 colleges and universities that are jointly managed. Successfully measured energy savings at this site should generate further installations within the managed group of educational facilities. While the financial metrics of the installation should be an acceptable 3 year ROI, the project will also help the facility meet its goals of reducing its carbon footprint.

Steven Martin, Executive Vice President & CTO, stated “these successful installations encompasses an initial 3 buildings for this particular university. This is the second university installation completed this year and based on results, should yield additional installations, at the same facility and others that are managed by the same group. The savings generated are impactful financially and in terms of meeting carbon reductions. We look forward to assisting this group with further savings.”

About Smartcool

Smartcool Systems Inc. provides cutting edge energy efficient and energy cost reduction solutions for businesses around the world. The EC03 and ESM are Smartcool's unique retrofit technologies that reduce the energy consumption of compressors in air conditioning, refrigeration and heat pump systems by up to 40%.

Total Energy Concepts (TEC), a wholly owned subsidiary of Smartcool, is a national leader in Power Protection, Energy Management, Power Quality, Facility Grounding, and Lighting Solutions that help companies improve their bottom line by reducing expenses that drastically cut into company profits. TEC focuses on a holistic approach to energy efficiency with proprietary technologies for power factor correction and third party technologies including LED, voltage conditioning and intelligent motor controls.

Legal Notice Regarding Forward Looking Statements

This news release contains "forward looking statements". Forward-looking statements are projections of financial performance or future events. Forward-looking statements can be identified by the use of words such as "expect", "anticipate", "intend", "plan", "believe", "estimate" and words of similar meaning. Forward-looking statements are based on management's current expectations and assumptions and they are subject to risks that may cause actual results to differ materially from those expressed or implied by such forward looking statements. Forward-looking statements in this news release include those concerning the company's belief in the growth opportunities in the UK and USA. These statements are subject to risks that may cause the actual results to be materially different in future periods from those expressed or implied by

such forward looking statements. Risks that may prevent or delay the forward looking statements from coming to fruition as anticipated include the availability of working capital, risks inherent in product development, as well as market factors that may increase costs or time to market. It is our policy not to update forward looking statements except to the extent required under applicable securities laws.
