

Valeo Pharma Completes Negotiations with Pan-Canadian Pharmaceutical Alliance for Redesca® and Redesca HP®

written by Raj Shah | April 6, 2021

April 6, 2021 ([Source](#)) – [Valeo Pharma Inc.](#) (CSE: VPH) (OTCQB: VPHIF) (FSE: VP2) (“**Valeo**” or the “**Company**”), a Canadian specialty pharmaceutical company, today announced that it has completed its negotiations and entered into a letter of intent (“LOI”) with the pan-Canadian Pharmaceutical Alliance (pCPA) regarding Redesca® and Redesca HP®, its low molecular weight heparin (“LMWH”) biosimilar, for the prevention and treatment of thromboembolic disorders.

“The successful conclusion of negotiations with pCPA is a significant milestone delivered for the Redesca® commercialization program. We can now exchange with the provincial, territories and federal instances to ensure coverage under publicly funded drug plans in Canada”, said Steve Saviuk, Valeo’s CEO.” While most prescriptions of LMWHs are initiated in the hospital, retail pharmacies play an important role in providing continued treatment to patients when they are discharged from hospital. Coverage by publicly funded drug plans are therefor a key component in making treatment available to Canadians”.

Commenting on the pCPA LOI, Frederic Fasano, Valeo’s President and Chief Operating Officer said; “We are particularly pleased to make Redesca® available soon for Canadian patients and also for hospitals. The team at Valeo have worked tirelessly to

ensure a robust supply of Redesca® especially in the current pandemic conditions where patients suffering from SARS-CoV-2 are undergoing severe coagulopathy with various thromboembolic complications. LMWHs, like Redesca® are key to prevent and treat those severe COVID-19 related thrombotic events.”

Established in August 2010, the pan-Canadian Pharmaceutical Alliance (pCPA) conducts joint provincial/territorial/federal negotiations for brand name and generic drugs in Canada to achieve greater value for publicly funded drug programs and patients through the use of the combined negotiating power of participating jurisdictions.

About Redesca®, Redesca HP®

Redesca® is a low molecular weight heparin biosimilar. LMWHs are injectable anticoagulant drugs used primarily to treat and prevent deep vein thrombosis and pulmonary embolism. Redesca® has more than 8 years of proven in-market safety internationally and more than 150 million patient days treated in Europe alone.
