

Visionstate Announces Rollout of AI for its WANDA(TM) Application

written by Raj Shah | February 8, 2023

February 8, 2023 ([Source](#)) – **Visionstate Corp. (TSXV:VIS)** (“**Visionstate**” or the “**Company**”) Visionstate IoT Inc., wholly-owned subsidiary of Visionstate, a leading provider of Internet of Things (IoT) solutions for the facility management sector, is proud to announce the incorporation of artificial intelligence (AI) into its WANDA™ application. With its AI partner, Fluido.ai, Visionstate is taking the next step in its journey to provide customers with cutting-edge technology and innovative solutions.

The WANDA™ application, which provides real-time monitoring and tracking of cleaning and maintenance activities, will now include AI “chatbot” capabilities that will enhance its functionality and provide users with a more efficient and effective experience. The AI algorithms developed by Fluido.ai will allow WANDA™ to analyze large amounts of data and make automated decisions, providing users with real-time insights and predictions that were previously unavailable.

For those who are not familiar with AI technology and why integrating it with the WANDA™ application is so exciting, here is a practical example:

- User: (using keystrokes or voice command) – “WANDA™ (the AI), tell me how many times in the last month a cleaning was missed?”

- WANDA™ (AI): (answer will be received by User in 10 seconds or less) – “In the month of January two cleanings were missed in the men’s and women’s restrooms on the first floor of the West Wing. Overall, the staff was 98% compliant with the cleaning protocols.”

“The chatbot can interact with customers on the website, the phone, Meta Messenger, WhatsApp, etc.; the business operator only needs to glance at one dashboard to see the total picture regarding its customer interactions through various channels,” said Wessam Gad El-Rab, Chief AI Officer and co-founder of Fluido.ai.

“We are thrilled to be working with Fluido.ai and incorporating their AI expertise into our WANDA™ application,” said Visionstate IoT Inc. President, Shannon Moore. “This collaboration allows us to bring the latest technology to our customers, providing them with “state-of-the-art” analytics and data in real-time.”

With the integration of AI, Visionstate is positioning itself as a leader in the IoT space and is committed to providing customers with innovative and effective solutions. The Company is dedicated to providing its customers with the best possible experience, and the incorporation of AI will help it to achieve this goal.

About Fluido.ai

Fluido.ai is an Edmonton, Alberta-based AI company that has created a Conversational AI technology “chatbot” for the restaurant industry and for the retail industry. The chatbot can work by text (where the customer types their questions and answers using a keyboard) or with a voice interface. The Fluido.ai chatbot also takes payments. In addition, Fluido.ai

has developed a recommendation engine that is currently being used by a US coffee chain. Visit our website at www.fluido.ai

About Visionstate Corp.

Visionstate Corp. (TSXV: VIS) is a growth-oriented company that invests in the research and development of promising new technology in the realm of the Internet of Things, big data and analytics, and sustainability. Visionstate IoT Inc. is a wholly-owned subsidiary of Visionstate Corp. Through Visionstate IoT Inc., it helps businesses improve operational efficiencies, reduce costs, and elevate customer satisfaction with its state-of-the-art devices that track and monitor guest activities and requests. The footprint of its WANDA™ smart device now extends to hospitals, airports, shopping centres, and other public facilities across and beyond North America. Through building up a collection of synergistic technologies, Visionstate Corp. will continue to innovate, reduce environmental impact, and transform consumer experiences.

Forward-Looking Statements

Certain information set forth in this material may contain forward-looking statements that involve substantial known and unknown risks and uncertainties. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding future financial position, business strategy, use of proceeds, corporate vision, proposed acquisitions, partnerships, joint-ventures and strategic alliances and co-operations, budgets, cost and plans and objectives of or involving the Company. Such forward-looking information reflects management's current beliefs and is based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "predicts", "intends", "targets", "aims", "anticipates" or "believes" or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions "may", "could",

“should”, “would”, “might” or “will” be taken, occur or be achieved. A number of known and unknown risks, uncertainties and other factors may cause the actual results or performance to materially differ from any future results or performance expressed or implied by the forward-looking information. These forward-looking statements are subject to numerous risks and uncertainties, certain of which are beyond the control of the Company including, but not limited to, the impact of general economic conditions, industry conditions and dependence upon regulatory approvals. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. The Company does not assume any obligation to update or revise its forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by securities laws.
