

Visionstate Corp. Announces New Deals in Canada and the US, Highlights Growing Opportunities in Education Sector

written by Raj Shah | January 7, 2025

January 7, 2025 ([Source](#)) – **Visionstate Corp. (TSXV: VIS)** (“**Visionstate**” or the “**Company**”), a facility management technology company with IoT and AI solutions, is pleased to announce three significant new agreements for its innovative WANDA technology, marking continued growth in both Canadian and US markets. These deals include three partnerships in Canada—two with prominent building service contractors and one with a childcare facility located on a First Nations community—and one in the United States with a private school in Virginia.

The partnerships with the Canadian building service contractors are particularly notable, as these companies typically manage an extensive portfolio of clients, effectively acting as resellers of the WANDA solution. These agreements represent a significant opportunity to scale WANDA’s reach across a broad network of facilities.

The agreement with the First Nations childcare facility highlights WANDA’s versatility and its ability to support essential community services by improving cleaning standards and operational efficiency.

In the United States, Visionstate’s deal with a Virginia-based private school underscores the increasing relevance of WANDA

technology in the education sector. The school plans to use WANDA to streamline the monitoring of setup and cleaning processes for special events, with significant potential for expansion throughout its school division.

In November, Visionstate participated in the annual ISSA Show in Las Vegas, where the company conducted approximately 40 demonstrations of the WANDA software over three days. These demos have generated multiple promising opportunities, and Visionstate is actively following up on these leads. In particular, the company sees significant potential in applying WANDA's capabilities to equipment monitoring-tracking performance and maintenance in much the same way it currently monitors cleaning tasks.

As disease outbreaks become more prevalent, Visionstate is also witnessing increased interest from educational institutions in adopting proactive monitoring solutions like WANDA to maintain safer and cleaner environments.

"We are incredibly excited about the momentum we are building as we head into 2025," said Shannon Moore, President of Visionstate. "These new deals in Canada and the US, combined with the interest generated at the ISSA Show, set the stage for significant growth. We are confident that WANDA's versatility-whether in cleaning, event management, or equipment monitoring-will continue to drive adoption across multiple sectors."

Visionstate remains focused on expanding its market presence and developing strategic partnerships to maximize the potential of WANDA technology across industries.

Forward-Looking Statements

Certain information set forth in this material may contain forward-looking statements that involve substantial known and unknown risks and uncertainties. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding future financial position, business strategy, use of proceeds, corporate vision, proposed acquisitions, partnerships, joint-ventures and strategic alliances and co-operations, budgets, cost and plans and objectives of or involving the Company. Such forward-looking information reflects management's current beliefs and is based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "predicts", "intends", "targets", "aims", "anticipates" or "believes" or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions "may", "could", "should", "would", "might" or "will" be taken, occur or be achieved. A number of known and unknown risks, uncertainties and other factors may cause the actual results or performance to materially differ from any future results or performance expressed or implied by the forward-looking information. These forward-looking statements are subject to numerous risks and uncertainties, certain of which are beyond the control of the Company including, but not limited to, the impact of general economic conditions, industry conditions and dependence upon regulatory approvals. Readers are cautioned that the assumptions used in the preparation of such information, although considered

reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. The Company does not assume any obligation to update or revise its forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by securities laws.
