Visionstate Launches MIRA to Digitize Facility Inspections and Expand SaaS Platform

written by Raj Shah | June 5, 2025

June 5, 2025 (Source) – Visionstate Corp. (TSXV: VIS) is pleased to announce the official launch of MIRA, its newest software-as-a-service (SaaS) platform designed to streamline and digitize inspections across public-facing facilities. The platform became available to customers in June 2025 following months of development and testing in real-world conditions.

MIRA represents the latest evolution in Visionstate's commitment to delivering smart, scalable, and data-driven tools for the facility management industry. Built as a natural extension of the company's flagship Wanda platform, MIRA allows facility teams to conduct audits, safety checks, and operational inspections with greater accuracy, accountability, and efficiency.

Designed for mobile use, MIRA incorporates real-time reporting, customizable checklists, QR code scanning, and secure cloud-based data storage. Whether tracking regulatory compliance in healthcare environments or conducting daily walkthroughs in retail and education facilities, MIRA empowers staff to standardize their processes and provides management with transparent, audit-ready records.

"The launch of MIRA is a major step forward in our vision to deliver an integrated suite of digital solutions for facility management," said **Shannon Moore, President of Visionstate.** "Where WandaLITE solves cleaning compliance, MIRA addresses a broader range of operational and regulatory

inspections. Together, they form a powerful platform – and one that positions Visionstate to lead in this emerging space."

The launch of MIRA also represents an important business milestone for Visionstate. As a **new product in the company's SaaS portfolio**, MIRA introduces a fresh recurring revenue stream that complements WandaLITE without increasing implementation complexity. Because most facility managers already conduct inspections using **paper-based methods**, MIRA offers a lower-friction transition to digital without the need for operational disruption. It also adds a valuable new layer of data that can be analyzed alongside cleaning and resource metrics to drive improved efficiency, accountability, and planning.

MIRA is offered on a recurring monthly SaaS model, either as a standalone platform or bundled with WandaLITE for clients requiring both cleaning log compliance and broader inspection capabilities. Pricing is designed to reflect ease of scaling by location or team size, aligning with Visionstate's strategy to grow its high-margin, subscription-based revenue streams.

Visionstate has already seen strong early interest in MIRA from several existing customers. Initial pilots are underway in sectors such as education, healthcare, and municipal government, where facility inspections are routine and documentation is essential. The ability to digitize and centralize these processes presents a compelling value proposition – particularly in industries where compliance requirements are rising.

The release of MIRA comes during a period of accelerated technical development at Visionstate. Over the past several quarters, the company has significantly invested in expanding its platform capabilities, including the launch of WandaLITE to support Ontario's Bill 190 legislation and ongoing development of AI-powered features that enable predictive task scheduling.

Together, these technologies represent a fully integrated approach to smart facility management.

MIRA is now available to Visionstate customers across Canada, with on-boarding support and customization available for enterprise clients. To learn more or request a demo, visit www.visionstate.com.

About Visionstate Corp.

Visionstate Corp. (TSXV: VIS) is a growth-oriented company that invests in the research and development of promising new technology in the realm of the Internet of Things, big data and analytics, and sustainability. Visionstate IoT Inc. is a wholly-owned subsidiary of Visionstate Corp. Through Visionstate IoT Inc., it helps businesses improve operational efficiencies, reduce costs, and elevate customer satisfaction with its state-of-the-art devices that track and monitor guest activities and requests. The footprint of its WANDA™ smart device now extends to hospitals, airports, shopping centres, and other public facilities across and beyond North America. Through building up a collection of synergistic technologies, Visionstate Corp. will continue to innovate, reduce environmental impact, and transform consumer experiences.

Forward-Looking Statements

Certain information set forth in this material may contain forward-looking statements that involve substantial known and unknown risks and uncertainties. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding future financial position, business strategy, use of proceeds, corporate vision, proposed acquisitions, partnerships, joint-ventures and strategic alliances and co-operations, budgets, cost and plans and objectives of or involving the Company. Such forward-looking information reflects management's current beliefs and is based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "predicts", "intends", "targets", "aims", "anticipates" or "believes" or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions "may", "could", "should", "would", "might" or "will" be taken,

occur or be achieved. A number of known and unknown risks, uncertainties and other factors may cause the actual results or performance to materially differ from any future results or performance expressed or implied by the forward-looking information. These forward-looking statements are subject to numerous risks and uncertainties, certain of which are beyond the control of the Company including, but not limited to, the impact of general economic conditions, industry conditions and dependence upon regulatory approvals. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. The Company does not assume any obligation to update or revise its forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by securities laws.
