

# Visionstate's WANDA Deployed to School Division: Demonstrates Versatility of Facility Management App

written by Raj Shah | December 1, 2022

December 01, 2022 ([Source](#)) – **Visionstate Corp. (TSXV:VIS)** (“Visionstate” or the “Company”) is pleased to announce the first deployment of its WANDA™ mobile app to a school division in Canada and has added yet another municipality to its growing list of customers.

The deployment of WANDA™ to a school division in Alberta marks the first installation of the technology in this sector, which continues to look for new technologies to track cleaning protocols as COVID and new flu viruses continue to persist.

The school division deployed Visionstate's technology using the WANDA™ mobile app in combination with QR codes to monitor cleaning in bathrooms, hallways, libraries, classrooms, and offices. A front entrance and front office QR code are also being used for both custodial staff to log cleaning and maintenance activities and provide visitors with an opportunity to flag potential issues.

“We are very excited about on-boarding our first school division,” said Visionstate IoT Inc.'s (“IoT”) President Shannon Moore. “With the continued threat posed by virus outbreaks and COVID-19, school divisions can use WANDA™ to ensure that cleaning protocols are being met, which is the first line of defence against the spread of disease.”

IoT also deployed to an Alberta municipality which is focusing on the cleaning of its large aquatic centre. The WANDA™ app is being used to monitor change rooms, office areas and community rooms. In addition, WANDA™ is tracking deck maintenance as well as supply room and first aid inventory.

“We have several firsts in terms of WANDA™’s application to pool maintenance and supply tracking in this environment,” Moore explained. “For example, deck maintenance is a critical part of the infrastructure and requires daily maintenance. A QR code is being used specifically for that purpose. Polishing high touch points, scrubbing pool scum, maintaining water test stations, and cleaning and repairing skimmer baskets are all new applications for WANDA™.”

The municipality is also tracking supplies using the WANDA™ app, from delivery to the supply room; to the first aid storage room; to the first aid cart which is on the pool deck. Each has a “check stop” monitored by a QR code so there is a backup to ensure first aid supplies are always available.

“The versatility of WANDA™ in the facility management environment continues to be demonstrated,” explained Moore. “In an era where disease outbreak is cause for concern, as well as ensuring efficiency in the delivery of services, WANDA™ stands out as the best solution for facility managers.”

Visionstate’s WANDA™ is marketed globally and generates revenue through a software-as-a-service model. Each new client builds recurring revenues where the margin is approximately 90%.

### **About Visionstate Corp.**

Visionstate Corp. (TSXV: VIS) is a growth-oriented company that invests in the research and development of promising new technology in the realm of the Internet of Things, big data and

analytics, and sustainability. Visionstate IoT Inc. is a wholly-owned division of Visionstate Corp. Through Visionstate IoT Inc., it helps businesses improve operational efficiencies, reduce costs and elevate customer satisfaction with its state-of-the-art devices that track and monitor guest activities and requests. The footprint of its WANDA™ smart device now extends to hospitals, airports, shopping centres and other public facilities across and beyond North America. Through building up a collection of synergistic technologies, Visionstate Corp. will continue to innovate, reduce environmental impact and transform consumer experiences.

### Forward-Looking Statements

Certain information set forth in this material may contain forward-looking statements that involve substantial known and unknown risks and uncertainties. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding future financial position, business strategy, use of proceeds, corporate vision, proposed acquisitions, partnerships, joint-ventures and strategic alliances and co-operations, budgets, cost and plans and objectives of or involving the Company. Such forward-looking information reflects management's current beliefs and is based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "predicts", "intends", "targets", "aims", "anticipates" or "believes" or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions "may", "could", "should", "would", "might" or "will" be taken, occur or be achieved. A number of known and unknown risks, uncertainties and other factors may cause the actual results or performance to materially differ from any future results or performance expressed or implied by the forward-looking information. These forward-looking statements are subject to numerous risks and

uncertainties, certain of which are beyond the control of the Company including, but not limited to, the impact of general economic conditions, industry conditions and dependence upon regulatory approvals. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. The Company does not assume any obligation to update or revise its forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by securities laws.
