

# Voyager Digital Announces Digital Asset Investing Solutions on Algorand

written by Raj Shah | December 3, 2020

December 3, 2020 ([Source](#)) – *Voyager receives grant from Algorand Foundation to expand DeFi offerings; 8.5% interest on USDC supported on Algorand available through Voyager*

[Voyager Digital Ltd.](#) (“Voyager” or the “Company”) (CSE: VYGR) (OTCQB: [VYGVF](#)) (FRA: UCD2), a publicly traded, licensed crypto-asset broker that provides investors with a turnkey solution to trade crypto assets, today announced that the Company will provide new financial offerings through enhanced integration of the Algorand Protocol. Voyager will also enable users to earn 8.5% on USDC supported on Algorand, when lent through Voyager’s services.

Voyager’s support for USDC and Algorand Standard Assets (ASA) will seamlessly enable users to avail of the transaction speed and guaranteed finality of the Algorand protocol, with full integration on the Voyager platform. Voyager will develop USDC payment rails on the Algorand protocol, such that consumers will have the ability to buy, hold, trade, and self-custody their USDC, ALGO, and Algorand Standard Assets on Voyager. The Algorand Protocol will make USDC transactions more efficient and less costly for consumers, as well as bring interest-bearing benefits to customers. Going forward, this development will facilitate future ASA tokens to be bought, sold, or transferred through the Voyager platform.

This adds to the growing Decentralized Finance and new financial applications coming to the Algorand ecosystem, as well as the

Voyager Platform.

“Voyager is excited to partner with the Algorand Foundation and honored that the Foundation has recognized Voyager’s technological expertise and capabilities,” said Steve Ehrlich, Co-Founder and CEO of Voyager Digital. “Voyager has built, from the ground up, the most consumer-friendly, easy to use agency brokerage for trading over 50 digital assets, commission-free. We look forward to a strong relationship with the Algorand Foundation.”

“The Algorand Foundation is delighted to announce that Voyager is a recipient of an AlgoGrant,” said Sean Lee, CEO of the Algorand Foundation. “Voyager will match their innovative App-based service with the speed and flexibility of USDC on Algorand, to create a greater experience for their users and the wider Algorand community.”

Mr. Ehrlich added, “As Voyager’s platform continues to rapidly garner widespread acceptance by mainstream investors and crypto enthusiasts alike, the Company will continue to partner with leading industry players, such as the Algorand Foundation, to provide consumers with the most robust and consumer-friendly digital asset investing experience available.”

### **About Voyager Digital Ltd.**

Voyager Digital Ltd. is a crypto-asset broker that provides retail and institutional investors with a turnkey solution to trade crypto assets. Voyager offers customers best execution and safe custody on a wide choice of popular crypto-assets. Voyager was founded by established Wall Street and Silicon Valley entrepreneurs who teamed to bring a better, more transparent and

cost-efficient alternative for trading crypto-assets to the marketplace. Please visit us at <https://www.investvoyager.com> for more information and to review the latest Corporate Presentation.

### **About Algorand Foundation**

The Algorand Foundation is a not-for-profit organization that has a vision of a borderless, frictionless economy built on public, decentralized blockchain technology. The Foundation, in partnership with Algorand Inc, has built the Algorand blockchain protocol – initially designed by cryptography pioneer and Turing award winner Silvio Micali and a team of leading scientists – as the cornerstone of achieving this vision. The Foundation envisions a wide breadth of applications being built on this protocol by a new, wider community of mainstream developers. The Foundation is committed to facilitating this innovation in a sustainable and eco-friendly manner by utilizing the Proof of Stake consensus algorithm.
