

# Voyager Digital Responds to System Outage

written by Raj Shah | December 29, 2020

December 29, 2020 ([Source](#)) – *Internal Process and Procedures prevented attempted threat to system*

[Voyager Digital Ltd.](#) (“Voyager” or the “Company”) (CSE: VYGR) (OTCQB: [VYGVF](#)) (FRA: UCD2), a publicly traded, licensed crypto-asset broker that provides investors with a turnkey solution to trade crypto assets, successfully prevented a cyber attack on its website and as part of its process and procedures in order to secure customer information and customer funds the platform was promptly shut down. The Company’s detection systems worked as planned and all customer funds and information are secure.

“With a highly experienced team that has previously built successful online brokerages, we know the importance of having robust and highly secure systems to counter cyber attacks. With our rapid growth to date bringing the business into the spotlight, we are fully prepared for such events and in this case have acted swiftly to prevent any impact on the business.

“Customer funds and security are of the utmost importance to Voyager. Whilst all funds and crypto are secure we have had to temporarily halt trading on the platform and we sincerely apologize for the inconvenience and thank our clients for their patience,” said Steve Ehrlich, Co-founder and CEO of Voyager. “We caught the attempted intrusion quickly and took the system down immediately to protect customer assets and information.”

Voyager will be up and running shortly as the team resets all the systems. Voyager will continue to evaluate its protection and monitoring on a regular basis to prevent attacks and future

risk of cyber incidents.
