

# Voyageur Announces Extension to Complete Proposed Private Placement

written by Raj Shah | November 26, 2024

November 26, 2024 ([Source](#)) – **Voyageur Pharmaceuticals Ltd.** (TSX.V: VM) (USA: VYYRF) (“**Voyageur**” or the “**Corporation**”), is pleased to announce that, further to its news release of October 17, 2024, the TSX Venture Exchange has granted an extension to the Corporation to complete its previously announced non-brokered private placement of up to 16,666,667 units (“**Units**”) at a price of \$0.06 per Unit, for gross proceeds of up to CND\$1,000,000 (the “**Offering**”). Voyageur intends on completing one or more closings up to and including December 30, 2024. For further details regarding the terms of the Offering, please see the Corporation’s news release of October 17, 2024.

Completion of the Offering is subject to regulatory approval including, but not limited to, the approval of the TSX Venture Exchange. The Common Shares, Warrants and Broker Warrants issued will be subject to a four month and one day hold period from the date of issuance. Insiders of the Corporation may participate in the Offering.

## **About Voyageur Pharmaceuticals Ltd.**

Voyageur, a Canadian public company trading under the symbol VM on the TSXV, is in development of barium and iodine Active Pharmaceutical Ingredients (API) and offers high-performance, cost-effective imaging contrast agents. With a strategic focus on vertically integrating the barium and iodine contrast market, Voyageur aims to become a key player by producing its own barium, iodine, and endo fullerenes.

Voyageur's business plan is expected to generate cash flow by partnering with established third-party GMP pharmaceutical manufacturers in Canada, ensuring the validation of its products by regulatory agencies worldwide. As Voyageur solidifies its presence in the market, it plans to transition into a high-margin domestic manufacturer of radiology drugs, further expanding its revenue streams.

Voyageur is committed to sustainability and environmental stewardship. Voyageur envisions a future where reducing carbon emissions is the norm, and to achieve this, it will build state-of-the-art carbon-capture infrastructure utilising the Rain Cage *EDEN™* system. By investing in carbon capture energy sources and sustainable manufacturing practices, Voyageur aims to generate revenue from carbon captured "advanced carbon production" to accelerate growth. Voyageur's unwavering commitment to the environment sets it apart as a pioneer in the industry.

At the core of its operations, Voyageur owns a 100% interest in the Frances Creek barium sulphate (barite) project. Currently, the world's pharmaceutical barium sulphate is almost entirely synthetically produced resulting in a less effective imaging quality product. Voyageur's Frances Creek resource boasts a rare and exceptional grade mineral suitable for the pharmaceutical marketplace that is intended to replace the current synthetic products with higher quality imaging products.

Voyageur's ambitious vision is to become the first vertically integrated company in the radiology contrast media drug market. By controlling all primary input costs, from the sourcing of raw materials to the final production, Voyageur ensures quality and cost efficiency. With its approach, it embodies the motto of "**From the Earth to the Bottle,**" highlighting Voyageur's commitment to responsible sourcing and manufacturing practices.
