ZEN Graphene Solutions Highlights Results of Annual Shareholder Meeting

written by Raj Shah | October 4, 2021

- ***Company receives shareholder support to transition toward its nanotechnology and health sciences focus***
- ***Retains CORE IR for investor relations, public relations, U.S. listing advisory and capital markets advisory***

October 4, 2021 (Source) – **ZEN Graphene Solutions Ltd.** (“**ZEN**” or the “**Company**“) (TSXV:ZEN)(OTC PINK:ZENYF), a Canadian, nanotechnology company focused on next-gen healthcare solutions, today announces that shareholders have approved all resolutions put forward at the annual shareholder meeting held on September 27, 2021. These resolutions include several initiatives to better align the company’s classifications and communications with its value proposition in nanotechnology and health sciences.

“We are extremely grateful and pleased that our shareholders are as enthusiastic about the new direction of our company as everyone here on the ZEN team. These resolutions will allow us to more properly position ZEN as an IP development company focused on technologies that enhance safety and improve health. We expect these steps to generate additional interest in the U.S. investment community and other markets where our story is currently underserved. These initiatives include potential listings on alternative exchanges in both the U.S. and Canada, a corporate name change, and a long-term incentive program for our employees aligned with these goals,” commented Greg Fenton, ZEN CEO.

The Company also recently retained CORE IR, a New York based investor and public relations firm focused on small to mid-cap companies, to assist in establishing relationships in the U.S. capital markets, advise on a potential US listing, interface with investors and engage in PR activities that provide greater visibility for the Company and its mission.

About ZEN Graphene Solutions Ltd.

ZEN is a nanotechnology company developing and commercializing next-gen healthcare solutions in the areas of prevention, detection and treatment. ZEN is currently focused on commercializing **ZEN**Guard™, a patent-pending coating with 99% antimicrobial activity, including against COVID-19, and the potential to use similar compounds as pharmaceutical products against infectious diseases. The company also has an exclusive agreement to be the global commercializing partner for a newly developed, highly scalable, aptamer-based rapid pathogen detection technology.
