About Zenyatta

Zenyatta’s Albany Graphite Project hosts a large and unique deposit of highly crystalline graphite. Independent labs in

Japan, UK, Israel, USA and Canada have demonstrated that Zenyatta's Albany Graphite/Naturally Pure™ easily converts (exfoliates) to graphene, using a variety of simple mechanical and chemical methods. The deposit is located in Northern Ontario, just 30km north of the Trans-Canada Highway, near the communities of Constance Lake First Nation and Hearst. Important nearby infrastructure includes hydro-power, natural gas pipeline, a rail line 50 km away, and an all-weather road just 10 km from the deposit.
