

# InvestorTalk Alert: Darren Cudmore to Host Francis Bellido of Quantum eMotion Corp. on Tuesday, February 24, 2026, at 9:00 AM EST

written by InvestorNews | February 23, 2026

InvestorNews.com is pleased to announce an upcoming InvestorTalk hosted by Darren Cudmore, featuring **Francis Bellido, President, CEO, and Director, [Quantum eMotion Corp.](#)** (TSXV: QNC | OTCQB: QNCCF), scheduled for **tomorrow, Tuesday, February 24, 2026, at 9:00 AM EST**. To participate in this engaging discussion, please email [tracy@investornew.com](mailto:tracy@investornew.com) to **RSVP**.

Quantum eMotion's mission is to address the growing demand for affordable hardware and software security for connected devices. Thanks to its patented Quantum Random Number Generator, QeM has become a pioneering force in classical and quantum cybersecurity solutions. This security solution exploits quantum mechanics' built-in unpredictability and promises to provide enhanced protection for high-value assets and critical systems. The Company intends to target highly valued Financial Services, Healthcare, Blockchain Applications, Cloud-Based IT Security Infrastructure, Classified Government Krown Technologies and Communication Systems, Secure Device Keying (IOT, Automotive, Consumer Electronics) and Quantum Cryptography.

In preparation for tomorrow's InvestorTalk, here are some recent news releases from Quantum eMotion for your review, which are listed below:

- February 19, 2026 – Quantum eMotion to Commence Trading on NYSE American Under the Ticker “QNC” – [click here](#)
- January 22, 2026 – Quantum eMotion Files a Form 40-F Registration Statement – [click here](#)
- December 29, 2025 – Quantum eMotion’s QRNG Demonstrates Real-World Security Performance Across DeFi, Post-Quantum Simulation, and Federal Certification Path – [click here](#)
- December 22, 2025 – Quantum eMotion Becomes Top Holding in Defiance Quantum ETF – [click here](#)

We found the December 29<sup>th</sup> news release titled, “*Quantum eMotion’s QRNG Demonstrates Real-World Security Performance Across DeFi, Post-Quantum Simulation, and Federal Certification Path*” particularly noteworthy and here are 5 key data points from it:

- **Perfect Independent Security Audit** – Quantum eMotion Corp. reported that its QRNG2 technology powered entropy used in the Krown Network audit, achieving a 100/100 security score, zero findings, full production approval, and a 5-Star confidence rating in a stringent DeFi security assessment.
- **Real-World Quantum Security Validation** – The audit demonstrated hardware-based quantum randomness functioning successfully in live production environments, validating quantum-secured cryptography under real adversarial conditions rather than laboratory testing alone.
- **Quantum Attack Resistance Confirmed** – Earlier simulations conducted with PINQ<sup>2</sup> using IBM’s Qiskit framework showed QRNG-generated entropy increases computational difficulty for Grover-based quantum attacks, keeping 256-bit key brute-force attacks computationally infeasible.
- **Federal Certification Pathway Advancing** – The Company is

progressing toward FIPS 140-3 certification with NIST-accredited Lightship Security, including entropy validation and cryptographic module compliance testing for regulated markets.

- **Commercial Deployment Opportunity** – Combined audit validation, simulation benchmarking, and certification efforts position Quantum eMotion’s technology for adoption across government, defense, healthcare, financial services, blockchain, and critical infrastructure cybersecurity applications.
