

InvestorTalk Alert: Francis Bellido from Quantum eMotion Corp. to host on Tuesday, June 17, 2025

written by InvestorNews | June 16, 2025

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Tuesday, June 17th, at 9 AM EST, featuring Francis Bellido, President, CEO, and Director, [Quantum eMotion Corp.](#) (TSXV: QNC | OTCQB: QNCCF). To participate in this engaging discussion, please [click here](#)

Quantum eMotion is a cybersecurity company on a mission to meet the rising global demand for affordable and robust hardware and software security across connected devices. Leveraging its patented Quantum Random Number Generator, QeM is emerging as a leader in both classical and quantum cybersecurity solutions. Its technology harnesses the inherent unpredictability of quantum mechanics to deliver advanced protection for high-value assets and critical systems. Quantum eMotion aims to serve a range of high-impact sectors, including Financial Services, Healthcare, Blockchain Applications, Cloud-Based IT Security Infrastructure, Classified Government Technologies and Communication Systems, Secure Device Keying (IoT, Automotive, Consumer Electronics), and Quantum Cryptography.

In preparation for tomorrow's InvestorTalk, here are the four most recent news releases from Quantum eMotion for your review, which are listed below:

- June 10, 2025 – Quantum eMotion CEO Francis Bellido to

Join Expert Panel on Quantum-Safe Network Technologies at IEEE ICC 2025 – [click here](#)

- June 2, 2025 – Quantum eMotion Closes Brokered LIFE Financing of \$12,000,000 – [click here](#)
- May 30, 2025 – Quantum eMotion Announces Upsized Brokered LIFE Financing of C\$12,000,000 – [click here](#)
- May 26, 2025 – Quantum eMotion Finalizes QRNG Hybrid Chip Design, Commences Manufacturing with TSMC – [click here](#)

Here are 5 key data points from their May 26th news release titled, *“Quantum eMotion Finalizes QRNG Hybrid Chip Design, Commences Manufacturing with TSMC”*:

- **Chip Design Finalized and Sent to TSMC:** Quantum eMotion has completed and validated the design of its first-generation QRNG chip, based on the quantum tunneling effect, and submitted it for fabrication to Taiwan Semiconductor Manufacturing Company (TSMC) using a 65-nm CMOS process.
- **High-Speed True Quantum Random Output:** The chip is engineered to generate over 1 Gbit/sec of true quantum random numbers with built-in self-diagnostics, targeting seamless integration with minimal external components.
- **Academic Validation:** Key components—such as an ultra-low-noise wideband amplifier and high-precision ADC—were successfully prototyped and validated by academic partners at ÉTS Montréal and the Institut Quantique at Université de Sherbrooke, ensuring integrity of quantum randomness.
- **Patent Protection and Integration:** The QRNG chip, protected by four international patents, is the first to embed quantum electron tunneling into a standard CMOS format, providing a scalable and high-performance cybersecurity solution.

- **Market Outlook:** The global QRNG chip market is valued at USD 150 million in 2024 and is projected to grow to USD 2 billion by 2033, with a 34.5% CAGR from 2026 to 2033, according to Verified Market Reports.
