InvestorTalk Alert: Ian Clifford from FuelPositive Corporation to host on Thursday, October 9, 2025

written by InvestorNews | October 8, 2025

InvestorNews.com is pleased to announce an upcoming InvestorTalk scheduled for tomorrow, Thursday, October 9, at 9 AM EST, featuring Ian Clifford, CEO and Chairman, FuelPositive Corporation (TSXV: NHHH | OTCQB: NHHHF). To participate in this engaging discussion, please click here

FuelPositive is a Canadian clean-tech company revolutionizing agriculture through decentralized, on-farm Green Ammonia production systems. These systems enable farmers to produce their own green nitrogen fertilizer and carbon-free fuel, reducing dependency on volatile supply chains and stabilizing costs. Each tonne of ammonia generated prevents up to two tonnes of CO_2e emissions, delivering both economic and environmental benefits. Built for simplicity, reliability, and remote operation, the containerized systems integrate easily into existing farm infrastructure and are engineered for Canadian conditions. The FP300 demonstration system, installed on an 11,000-acre farm in Sperling, Manitoba, produces 100 metric tonnes of Green Ammonia annually and serves as the foundation for the FP1500 commercial model, capable of 500 tonnes per year. Supported by Stantec, FuelPositive aims to establish Canada as a global hub for decentralized Green Ammonia production, driving sustainable agriculture, economic growth, and high-value employment in engineering, science, and skilled trades.Top of Form

In preparation for tomorrow's InvestorTalk, here are some recent news releases from FuelPositive for your review, which are listed below:

- October 1, 2025 – FuelPositive Provides Financing Update for Ongoing LIFE Offering – click here
- September 2, 2025 – FuelPositive Provides Corporate Update: French Offering Document Available, Updated Website, and Strong Financing Interest – click here
- August 15, 2025 – FuelPositive issues clarification regarding a statement made in its August 13, 2025 Press Release – click here
- August 13, 2025 – FuelPositive Announces Filing of Offering Document for $5 Million Life Private Placement Financing – click here

We found the September 2nd news release titled, "*FuelPositive Provides Corporate Update: French Offering Document Available, Updated Website, and Strong Financing Interest*" particularly noteworthy and here are 5 key data points from it:

- **Transition to Commercial Deployment:** FuelPositive is moving from development to deployment of its proprietary on-farm Green Ammonia systems, marking a major step toward commercialization and real-world application of its technology.
- **Demonstration System Milestone:** The first FP300 demonstration system has been delivered to an 11,000-acre grain farm in Sperling, Manitoba, designed to produce 100 metric tonnes of Green Ammonia per year, serving as the foundation for future commercial units.
- **Strong Financing Interest and Strategic Timing:** The Company reports significant investor interest in its

ongoing financing, which is strategically aligned with the activation of its first system and entry into the demonstration phase—key milestones in its commercialization roadmap.

- **Next-Generation FP1500 Commercial System:** Building on the FP300, FuelPositive is developing the FP1500 system, capable of producing 500 metric tonnes of Green Ammonia annually, intended for farms of roughly 10,000 acres.
- **National Manufacturing and Economic Vision:** Supported by Stantec, FuelPositive aims to position Canada as a global centre of excellence for decentralized Green Ammonia production, driving innovation, job creation, and sustainable agricultural growth.
